TEAS' WEEPING MULBERRY

INTRODUCTORY

IT has been my aim during the many years that I have been conducting my steadily increasing business to treat each individual customer in a manner that would make it possible for him to recommend me to others, and I cannot help but feel that my efforts, which have always been in the direction of improvement, have not been in vain, as attested by the hundreds of commendable letters and faithful support of my many friends during the past season, and in presenting this catalogue, I take this opportunity to thank my many friends for the liberal and ever-increasing patronage which has been bestowed upon me, and for which I am truly grateful, and hope by the same honest, straightforward business methods, liberal treatment, promptness and fair dealing, to maintain their confidence, and solicit a continued share of their patronage. My energies are devoted to carrying on a business that has for its fundamental principles the supplying of **High-Grade Nursery Stock** at fair and honest prices, and if you will give my stock a trial I will certainly appreciate the confidence you place in me, and will, I assure you, spare no effort to prove to you that you were justified in doing so.

Grown Under My Personal Supervision. My stock this season is more complete than ever before, having added many valuable varieties to the already extensive list, including a complete assortment of Fruit, Nut, Shade, Ornamental and Evergreen Trees, Shrubs, Vines, Small Fruit Plants, Perennials, Roses, etc., and, in fact, everything necessary for the complete planting and beautifying of the home grounds, Park, Garden and Orchard; all young and thrifty, **free from disease**, and equal in every respect to any grown in the United States. Entomologist's certificate of inspection will accompany every shipment.

I have aimed to keep my prices as low as possible, consistent with the quality of stock offered, believing the best is none too good and is cheapest in the end.

I have endeavored to give accurate and comprehensive descriptions of all Trees, Plants, Vines and Shrubs catalogued, and have not knowingly exaggerated, and if I can further assist you in making judicious selection, either by letter or otherwise, do not hesitate to write me. All inquiries will be cheerfully and honestly answered.

Pomona Nurseries are located on the **Burlington Turnpike**, at **Five Points**, one mile from **Palmyra**, my nearest **Post Office** and **Passenger Depot**, and six miles from **Camden**, and I extend a cordial invitation to all who are interested in a good Orchard, Garden, or Lawn, to visit my nurseries and inspect my stock.

CONDITIONS OF SALE

Prices.—The prices in this catalogue abrogate previous quotations. The prices affixed are for quantities specified, but half-dozen, 50 and 500 trees or plants of any one kind will be supplied at dozen, 100 and 1000 rates respectively.

Delivery.—All packages will be delivered to Riverton Station free of cost, after which they are at the risk and expense of the purchaser. In case of loss or delay, the purchaser must look for damages to forwarding companies alone.

Substitution.—When varieties are ordered which I do not have in stock, others, similar or better, will be substituted, unless requested not to substitute by the person ordering.

Guarantee.—I exercise care that all stock shall be genuine, unmixed and true to name and quality represented, free from insects and disease, and accept your order with the understanding and agreement that should any prove untrue to name, I will replace them with the genuine, but I am not liable for damages other than herein named.

Terms.—Cash with order, unless by special arrangement. No goods will be sent C. O. D. unless *one-half* the amount reaches me before shipment of goods.

Money can be sent safely by Post-Office Order on Palmyra, New Jersey, Bank Check, Draft, or Registered Letter, direct to

POMONA NURSERIES

HINTS ON CARE OF STOCK

MORE THAN TWENTY-FIVE YEARS' EXPERIENCE in growing and testing fruits, propagating, digging, packing and shipping Nursery Stock, should be considered by the intending purchaser. It is our desire that all orders entrusted to our care shall be executed in the best possible manner, that they reach our customers in good condition, that they succeed with them, and we are mutually benefited by the transaction. We therefore give some instructions which may prove of interest and benefit to some. If your stock is shipped by express, it should arrive within a day or two of your shipping advice; if by freight, one to two or three weeks later, according to the distance.

CARE OF TREES AND PLANTS ON ARRIVAL.—If not ready to plant on day of arrival, or if you have more than you can plant within a few hours, they should be at once heeled in. Select a well-drained spot, dig a trench about eighteen inches deep, sloping on one side; place the roots in the bottom of trench with the tops leaning up the sloping side. Spread out the trees so that the earth will come in contact with each and every root; then sift in fine dirt among the roots; fill the trench partly full, and press firmly with the feet; then fill up level with top of ground and press again with the feet and cover with loose dirt. Trees thus "heeled-in" will keep in good condition a long time. Do not cover with litter or straw; it will make harbor for mice during Winter.

IF FROZEN WHEN RECEIVED, bury the package **unopened**, in well-drained ground, or place in a cool cellar, so that it will thaw out slowly and gradually without being exposed to the air.

IF THEY SHOULD APPEAR DRY OR SHRIVELED when received, through delay in transit or any other cause, take them from the package and plunge into a tub of water, or bury the roots in the ground in an inclining position, so as to cover one-half or more of the tops with the earth, and thoroughly soak with water and let it remain for twenty-four hours or more until they regain their fresh, plump appearance, when they may be planted.

PLANTING.—Dig the holes wide enough to admit the roots in their natural position without cramping, and deep enough to allow the tree to stand the same depth it stood in the nursery, throw the surface and the sub-soil in separate piles; cut off smoothly from the under side all broken or bruised roots and *cut back the past season's growth of top one-half to two-thirds*, leaving two to three good buds to each branch—except for Fall planting in cold climates, when it is best to defer top-pruning until Spring, just before the buds start. At all times keep the roots carefully protected from the sun and wind. Place the tree in the hole; fill in with fine surface soil, working it in and among the roots, placing them out in their natural position; when hole is half full, pour in a little water and press firmly with the foot, filling all cavities and air spaces with earth so that it will come in contact with all the roots; continue to fill up and keep pressed until the hole is full, when it should be covered with loose dirt to prevent baking, **being careful not to get too deep.**

NEVER PUT ANY MANURE IN THE HOLES. A little bone dust or good rich soil is best in the bottom of the hole, and the fertilizers applied to the surface and worked in. A covering of *coarse manure, straw, litter, hay*, or even stones the first season, will retain the moisture, prevent injury from drought, and be of great benefit during a dry season.

SMALL FRUIT PLANTS should be set in pail of two or three inches of water and taken out one at a time as planted, and not allow the roots to be exposed to the sun or air. If not ready to plant strawberries on arrival, *do not pour water on them* in the packages or in the bunches, as they will surely heat and spoil. They may be spread out thinly in shallow trenches with their crowns even with the surface, and heeled-in as advised for trees, and sprinkled with water and shaded for a few days.

REPLACING STOCK.—We guarantee trees and plants to be first-class, healthy, carefully packed, and to reach our customers in good condition if sent by mail or express; but we cannot be held responsible for their failure to grow through neglect, improper planting, unfavorable seasons, or other causes beyond our control, and we do not insure their living after having passed out of our hands and care. We will, however, share the loss with our customer and replace failures, upon satisfactory proof of proper care and treatment, at one-half original cost of the plants that have failed.

DISTANCES FOR PLANTING

Number Required to the Acre

FRUIT TREES

	Distance Apart	No. per Acre
Apples30 feet	50

Rhubarb	4 feet	4 feet	2,725

EVERGREEN TREES

Desirable in all ornamental planting, as they retain their foliage through the Winter, adding a tone of warmth and verdure, and imparting a charm to the landscape that deciduous trees are incapable of. They should be judiciously planted on small as well as on large grounds. On the latter, the larger kinds can arrive at full development, and should be planted at distances sufficient to allow of their natural and symmetrical growth without crowding. The Arborvitas, Junipers, Dwarf Pines and Retinosporas on account of their small size, are most suitable for small lots; but nearly all species and varieties look well on small grounds while the trees are young.

Abies. Fir

Abies cephalonica. *Cephalonian Fir.* Large size, broad for its height while young, then pyramidal, leaves silvery and dagger-shaped with a spine on the point. Generally hardy. 2 to 2½ feet, \$2.00; 3 to 4 feet, \$5.00.

A. concolor. *Silver Fir of Colorado.* Without doubt the finest of the Rocky Mountain evergreens. Tree of graceful habit; broad, handsome foliage, bluish above, silvery beneath. A grand tree, very distinct and exceedingly rare as yet. 1 to 2 feet, \$1.50; 2 to 3 feet, \$2.50; 3 to 4 feet, \$5.00.

A. concolor violacea. *Silver Fir of Colorado.* Broad handsome foliage, bluish, or glaucous green above, silvery beneath. The variety here offered is a selected type, of which the foliage is a very pronounced bluish, or glaucous green. A grand tree. Very distinct and exceedingly rare. Fine trees. 2 feet, \$2.00; 3 feet, \$4.00; 4 feet, \$5.00.

A. lasiocarpa. *Western Balsam Fir.* In general appearance resembles the Concolor. The foliage varies in color from a glaucous-blue to a very light green. It is a very graceful tree, retaining its lower limbs as it grows older. 2½ to 3 feet, \$3.00; 4 to 5 feet specimens, \$5.00.

Abies concolor

A. nobilis glauca. A beautiful blue, or glaucous green type of this noble and majestic tree. Fine plants. 1½ feet high, \$2.00.

A. Nordmanniana. *Nordmann's Silver Fir.* Slow growth, hardy, eventually large, horizontal branches, dark green, massive foliage, silvery underneath, broad and compact. The contrast of its old and new growth is most charming. One of the most symmetrical as well as effective of evergreens. Valuable for landscape effects or for planting as a specimen tree. 1 to 2 feet, \$1.00; 2 to 3 feet, \$2.50.

A. Pinsapo. *Pinsapo Fir.* Very handsome, densely branched, resembling **P. Cephalonica**; branches very thickly placed in whorls, and spreading horizontally. A picturesque and beautiful evergreen. 1 to 1½ feet, \$1.00; 1½ to 2 feet, \$1.50.

A. polita. *Tiger-tail Spruce.* A peculiar open-headed evergreen, whose grotesque, slender branches are covered with dark green foliage. It is unique and a valuable specimen tree, and grows to 90 feet; when old somewhat resembles in character the Norway Spruce, with more pendulous branches. 3 to 4 feet, \$3.00; 2 to 3 feet, \$2.00.

ABIES. FIR--Continued

A. Veitchii. *Veitch's Fir.* Slender pubescent branches covered with leaves of a beautiful dark green above and silvery white beneath. Very hardy in our northern States. 2½ to 3 feet, \$2.00; 3 to 4 feet, \$3.00.

Cedrus. Cedars

Cedrus atlantica. *Mt. Atlas Cedar.* Vigorous, pyramidal, open and airy; foliage denser than that of the Cedar of Lebanon, and like that very thick on the upper side of the branches. Hardy, and a very noble tree, and should be planted where it can be looked down upon. 1 to 2 feet, \$1.00; 2 to 3 feet, \$2.00.

C. atlantica glauca. *Mt. Atlas Silver Cedar.* One of the most beautiful evergreens yet sent out. Upright growth, but low-branched and of compact habit, with solid foliage entirely covering the branches. Leaves very fine and of a delicate steel-blue tint, equal to the finest of the glaucous Colorado Blue Spruces. Perfectly hardy in northern Europe, and should succeed where the Retinosporas do well. A great acquisition to the list of choice Coniferae. 1 to 2 feet, \$2.00, 2 to 3 feet, \$2.50, 4 to 5 feet, \$4.00.

C. Deodara. *Deodar, or Indian Cedar.* Of vigorous growth; pyramidal form; graceful foliage of a light, silvery or glaucous green. One of the most beautiful of evergreens; not entirely hardy north of New York. 1 to 2 feet, \$2.00; 2 to 3 feet, \$3.00.

Cephalotaxus. Japanese Yews

Cephalotaxus drupacea. Forms a beautiful low bush, with stiff, spreading branches of light green. 1 to 2 feet, \$2.00; 2 to 3 feet, \$3.00.

Cedrus atlantica glauca

Picea excelsa. Norway Spruce--See page 4

C. Fortunei. Medium size, rounded form; foliage dark green; long, slender branches. 1 to 2 feet, \$2.00; 2 to 3 feet, \$3.00.

Juniperus. Juniper, Red Cedar

Juniperus japonica. *Japanese Juniper.* A dense bushy grower, with light green and glaucous foliage that blends harmoniously together. The tips of the branches have a characteristic curl about them that gives this species a certain individuality, making it one of the most ornamental of its kind. 1 foot, 50c.; 1 to 2 feet, 75c.; 2 to 3 feet, \$1.50.

J. japonica aurea. *Golden Japan Juniper.* Similar in outline and habit to above, with a deep golden coloring that persists even in Winter. 10 to 12 inches, \$1.00.

J. hibernica. *Irish Juniper.* A tall, columnar tree, with glaucous green foliage. It is very useful in formal planting, screening, for small yards and cemeteries. It is unique in appearance and for some purposes unexcelled. 1 to 2 feet, 25c.; 2 to 3 feet, 50c.

J. Sabina. *Savin Juniper.* A low, wide-spreading, somber and thickly branched evergreen shrub. Desirable for borders of evergreen beds. 10 to 12 inches, 50c.

J. virginiana. *Red Cedar.* A familiar tree, of medium size and pyramidal habit. It is extremely hardy, and thrives even in barren places, where other trees will not grow. 2 to 3 feet, \$1.50; 3 to 3½ feet, \$2.00.

Picea. Spruce

Picea alba. *White Spruce.* Fine compact, pyramidal form, moderate growth, foliage silvery-gray and light-colored. Suited to the seashore. A valuable evergreen more compact and symmetrical than the Norway Spruce. 2 to 3 feet, \$1.00.

P. Alcockiana. *Ajanensis.* A beautiful tree, the underside of the foliage being of a silvery-blue color. We consider this one of the choicest of ornamental evergreens. An excellent tree for a specimen on the lawn. 12 to 18 inches, 75c.; 2 to 3 feet, \$2.00.

P. canadensis. *Hemlock Spruce.* A medium-sized tree, with open, pendulous branches, whose graceful character is in striking contrast to some of the more stiff and formal conifers. It is a rapid grower, very hardy and not particular as to soil. If trimmed it becomes dense and bushy, making especially beautiful hedges. For tall screens, massing, or as individual trees upon large or small grounds, their grace and beauty is unsurpassed. 12 to 18 inches, 35c.; 2 to 3 feet, \$1.00; 3 to 4 feet, \$2.00.

P. Douglasi. *Douglas' Spruce.* Large, conical form, smooth bark, branches numerous, irregularly placed along the stem, spreading, horizontal, sometimes a little ascending. Leaves light green above, glaucous below. 1 to 2 feet, 75c.; 2 to 3 feet, \$1.25; 4 to 5 feet, \$3.00.

P. Engelmanni. *Colorado Spruce.* A pretty bluish green Spruce, with horizontal branches and of compact growth. It closely resembles the Blue

Picea Engelmanni. Colorado Spruce

Spruce. It is especially hardy and attractive on lawns. 1 foot, \$1.00; 2 feet, \$2.00; 3 feet, \$3.00.

P. excelsa. *Norway Spruce.* This, our common Spruce, embraces more desirable features than any of the others. It is rapid growing; does well in most soils, and withstands the bleak, cold winds of Winter. It is highly valued for shelters, windbreaks or hedges. The branches become pendulous with age. If left untrimmed they spread out magnificently over the lawn, and make desirable specimens. If pruned, they become stately trees of symmetrical form. 2 to 2½ feet, 50c.; 2½ to 3 feet, 75c.; 4 to 5 feet, \$2.00.

P. Fraseri. *Fraser's Silver Fir.* Very hardy and much resembling the Balsam Fir, only richer looking and of more permanent beauty. 1 to 2 feet, 75c.; 2 to 3 feet, \$1.50.

P. var. inverta. *Inverted Spruce.* The needles are larger and brighter than those of the species. The lateral branches sprawl about in grotesque, contorted forms. The appearance is extremely odd, and the unacquainted stop to admire this tree, which to them is a freak of nature. It is very useful on lawns, and does much to break the regular outline of other evergreens. 12 to 18 inches, 75c.; 2 to 3 feet, \$2.50; 3 to 4 feet, \$3.50.

P. Kosteriana. *Koster's Blue Spruce.* In this new variety the color is a deeper, richer blue. It is the highest type of Blue Spruce and one that cannot be too highly recommended. This is one of the finest ornamental evergreens ever introduced, and a specimen or two, of the kind of trees we furnish, on the lawn, adds a dignity and beauty to it hard to describe. 1 to 1½ feet, \$1.50; 1½ to 2 feet, \$2.50; 2 to 3 feet, \$5.00; 4 to 5 feet, \$10.00.

P. orientalis. *Oriental Spruce.* Slow growth, but tall, compact, straight and spiral, with deep shadows; dark, small, shining green foliage. Very hardy. One of the finest of all evergreens. 12 to 18 inches, \$1.00; 2 to 3 feet, \$2.00.

P. pendula. *Weeping Spruce.* Distinct, lighter foliage; like inverta a weeping form of Norway Spruce, originating in Boston. 12 to 18 inches, 75c.; 1½ to 2 feet, \$1.50; 3 to 4 feet, \$3.50.

P. pungens glauca. *Colorado Blue Spruce.* It is hardy, vigorous, long-lived and upright in habit. If pruned, it becomes dense and symmetrical; if untrimmed, open and graceful. The light silvery blue coloring is a rare bestowal of nature, and one she has saved for these grand trees. For color contrasts in groups of evergreens, or as ornaments to any lawn, they stand without a peer. 1 foot, \$1.00; 2 feet, \$2.00; 3 to 4 feet, \$3.50; 4 to 5 feet, \$5.00. Select specimens, \$10.00 to \$25.00.

P. Remontii. A dwarf form of *P. excelsa*, slightly inclined to fastigate shape; compact and hardy. 2 to 3 feet, \$3.00.

Pinus. Pine

Pinus austriaca. *Austrian Pine.* A tall, massive tree, with spreading branches, heavily plumed with long, stiff, dark green needles. A useful species along the coast, and grows equally well inland. It is popular for grouping or as specimens. 2 to 3 feet, \$1.25; 3 to 4 feet, \$2.50; 5 to 6 feet, \$5.00.

P. Cembra. *Swiss Stone Pine.* A very hardy and handsome Pine, with short, bluish green leaves, that grows slowly into a compact pyramidal tree. Its branches symmetrically, even at the base, and makes a beautiful ornament for small places or for contrasting with other evergreens. 12 to 18 inches, \$1.50.

PINUS. PINE—Continued

P. excelsa. *Bhotan Pine.* In general appearance resembles the White Pine. The soft, long needles are light green, and droop in graceful fringes from the long, slender branches. It becomes a tall tree and is very attractive where given room to develop. 2 to 2 feet, \$1.00; 3 to 4 feet, \$2.00; 5 to 6 feet, \$5.00.

P. Mughus. *Mugho Pine.* Low growing, broad spreading tree. It is more of a large pine bush than a tree, and is very ornamental. 1 to 2 feet, \$2.50; 2 to 3 feet, \$5.00.

P. Strobus. *White Pine.* The most common and quickest-growing of the pines. It withstands the hardships of Winter, grows well in sandy soils and barren places. Develops into a tall, noble tree whose ruggedness in old age is picturesque and grand. The needles are soft and silvery green; the horizontal branches are in regular whorls about the trunk, making the young trees symmetrical, open pyramids. It grows into naturally beautiful specimens; makes fine backgrounds and shelter-belts, and is valuable in any planting. 1 to 2 feet, 50c.; 2 to 3 feet, \$1.00; 3 to 4 feet, \$1.50.

P. sylvestris. *Scotch Pine.* A strong and rapid grower, with spreading branches and short, stiff, bluish green needles. Not a long-lived tree, but valuable for quick effects. Generally useful, and one of the most popular Pines. 2 to 3 feet, \$1.00; 3 to 4 feet, \$1.50.

Retinospora. Japan Cypress

Retinospora filifera. *Thread-Branded Retinospora.* Of pyramidal outline, with horizontal branches and drooping, deep green foliage. Particularly charming when a rain-storm has tipped each twig with crystal drops. 2 to 3 feet, \$2.50; 4 to 6 feet, \$5.00.

R. gracilis aurea. A slightly drooping, graceful Retinospora, branchlets slightly tinged with yellow. 3 feet, \$2.50; 4 feet, \$4.00.

R. obtusa. *Obtuse-leaved Retinospora.* Largest of the family. Of upright growth and much admired. The soft green foliage, arranged in flat filaments, gives the tree an airy appearance. 2½ to 3 feet, \$2.00.

R. obtusa aurea. Similar in character to the preceding, with a clear golden colored foliage that is bright and fresh all the year. 12 to 18 inches, \$2.00; 18 to 24 inches, \$3.50.

R. obtusa nana. A slow-growing dwarf variety that attains great age. It is popular in Japanese gardens, and attracts much attention here. The deep dark green leaves are arranged in flattened masses that rise above one another, making a dense, heavy foliage, and giving it a beautiful individuality. 12 to 18 inches, \$1.50; 18 to 24 inches, \$2.50.

R. pisifera. *Pea-Fruited.* Smaller than *R. obtusa*, with fine feathery foliage; branches glaucous underneath. A distinct and beautiful variety. 1 to 2 feet, 75c.; 2 to 3 feet, \$1.50; 3 to 4 feet, \$2.00.

Pinus austriaca. Austrian Pine—See page 4

R. pisifera aurea. A variety of the preceding. Growth tessellated and very wavy; vigorous habit; foliage rich golden and permanent. 1 to 2 feet, \$1.00; 2 to 3 feet, \$2.00; 3 to 4 feet, \$2.50.

R. plumosa. *Plume-like Retinospora.* Of conical outline, with light, feathery green foliage. It stands shearing well, and if frequently pruned becomes compact and dense. It is useful in groups, beds or for vases and window boxes. 12 to 18 inches, 75c.; 2 to 3 feet, \$1.50.

R. plumosa argentea. *Silver Plume-like Retinospora.* Silver-tipped foliage. 12 to 18 inches, \$1.50.

R. plumosa aurea. The most popular and generally useful of all the golden evergreens. In character it resembles *R. plumosa*. Is especially ornamental, and the soft plume-like golden foliage is particularly bright in Spring. When pruned it becomes symmetrical and regular. It is low-branched, and the golden yellow foliage brushes the green grass in beautiful contrast. A vigorous grower, and unsurpassed for color effect in grouping. It is well adapted for small lawns, and equally appropriate for larger areas. For window-boxes, vases, or formal gardening its value is realized. 12 to 18 inches, 75c.; 2 to 3 feet, \$1.50; 3 to 4 feet, \$3.50; 4 to 5 feet, \$4.50.

R. squarrosa Veitchii. Possesses the merits of *R. plumosa*, resembles it in character, and is useful in the same ways. The foliage is feathery, and of a rich, silvery glaucous or steel-blue that contrasts finely with the dark green and golden tints of other varieties. One of the most showy and attractive of the class. 1 to 2 feet, \$1.00; 2 to 2½ feet, \$2.00; 3 to 4 feet, \$4.00; 5 to 6 feet, \$8.00 to \$10.00.

Sciadopitys. Umbrella Pine

Sciadopitys verticillata. *Umbrella Pine.* Japan. Very slow growth while young, eventually large size; dark green shining foliage arranged in whorls of umbrella-like tufts on horizontal branches. Perhaps the most remarkable and beautiful conifer brought from Japan. 1½ to 2 feet, \$2.00; 2 to 3 feet, \$5.00; 3 to 4 feet, \$7.00.

Taxus. Yew

Taxus baccata. *English Yew* A densely-branched, spreading bush, of a dark, somber hue: one of the best evergreens for clipping into artificial forms. 2 to 3 feet, \$1.50; 3 to 4 feet, \$2.00

T. baccata, var. fastigiata aurea. *Golden Irish Yew.* In character similar to the preceding, with young foliage a brilliant golden yellow. Much valued for formal work. 1½ to 2 feet, \$2.00.

T. cuspidata. *Abrupt Pointed Yew* Japan. Dense, bushy, with somewhat ascending branches and dark green foliage; moderate growth. Most hardy of the Yews. Choice and rare. 12 to 18 inches, \$1.00; 18 to 24 inches, \$1.50.

T. hibernica. *Irish Yew* An upright growing variety, with deep, dark green foliage; branches erect, closely compressed, forming a pyramidal or broom-shaped head; a very distinct and beautiful variety. 12 to 18 inches, \$1.00; 18 to 24 inches, \$1.50.

Sciadopitys verticillata. Umbrella Pine

Taxus baccata aurea. Golden-leaved Yew

Thuya. Arborvitæ

Thuya occidentalis. *American Arborvitæ.* A well known shrub or tree popular for ornamental hedges, rapid growth, conical form. 2 to 3 feet, 50c.; 3 to 4 feet, \$1.00; 5 to 6 feet, \$2.00.

T. o. var. aurea. *George Peabody's Arborvitæ.* Color effect a clear, shining golden yellow that contrasts finely with darker evergreens. Of pyramidal habit, grows rapidly; has the brightest and most permanent color of all. Surely one of the handsomest of the golden tinted conifers. 1½ to 2 feet, \$1.50; 3 to 4 feet, \$3.00.

T. o. compacta. *Compact Arborvitæ.* Dwarf, dense little evergreen, having light green foliage and neat attractive habit. For beds, borders, cemeteries, or house decoration it is highly popular. 12 to 18 inches. 75c.

T. o. var. Ellwangeriana. In many respects it is similar to the *Retinispora* and seems to be the connecting link between *Arborvitæ* and that family. It is pretty, hardy, with silvery foliage, that closely resembles *T. ericoides* when young, but in Winter it does not turn so dark. Its low growth and compact symmetry make it valuable for decoration in small areas. 12 to 15 inches, 75c.; 15 to 18 inches, \$1.00.

T. o. globosa. *Globe Arborvitæ.* Very dwarf and compact; grows naturally into a rounded, almost ball-like form, that makes it useful for grouping, specimens, or vases. The foliage is deep, dark green. 10 to 12 inches, 50c.; 12 to 18 inches, 75c.

T. o. Hoveyi. *Hovey's Arborvitæ.* Slow growth, pyramidal form, golden green tinge. Most ornamental of American *Arborvitæ*s. 18 to 24 inches, 75c.

T. o. lutea. A tree of compact, upright growth, with beautiful yellow-tipped foliage that is gracefully suspended by slightly drooping branches. Very useful for specimens, and desirable for contrast in making groups. 1 to 2 feet, \$1.50; 2 to 3 feet, \$2.00; 4 to 5 feet, \$4.00.

T. o. pyramidalis. *Pyramidal Arborvitæ.* The most narrow, columnar-like of evergreens, medium growth, very distinct, light green, compact foliage. Very effective in landscape; takes the place of the Irish Juniper, which is not always hardy. 18 to 24 inches, 50c.; 2 to 3 feet, 75c.; 3 to 4 feet, \$1.00.

T. o. var. Vervæneana. *Vervæne's Arborvitæ.* Of medium, upright growth and dense habit. The green and golden tinted leaves blend harmoniously. Has marked individuality. Is valuable for planting with other evergreens, to give variety. 3 to 4 feet, \$2.00.

T. o. var. Wareana; syn., sibirica. *Siberian Arborvitæ.* An especially valuable species for cold climates. Dense and shapely, medium height, in much demand for general purposes. 2 to 3 feet, \$1.50; 3 to 4 feet, \$2.50.

Thuya occidentalis aurea

T. orientalis elegantissima. *Biota orientalis.* Medium size, upright pyramidal torch-like form, foliage flaky, tipped with yellow, giving it a bright golden color all Summer and Autumn, and turning bronze brown in Winter. One of the most elegant of evergreens. 1 to 2 feet, 50c.; 2 to 3 feet, \$1.50; 3 to 4 feet, \$3.00; 4 to 5 feet, \$4.00.

BROAD LEAVED EVERGREENS

Buxus. Box Tree

Buxus sempervirens. *Common Tree Box.* The familiar box of our grandfathers. Grows slowly into large, broad bushes. A strong grower in almost any soil and does well in shaded places. It stands shearing well and may be sheared in any form. 1 to 2 feet, \$1.00; 2 to 3 feet, \$1.50.

Boxwood Edging. Well-rooted, bushy plants, 4 to 6 inches, \$1.00 per doz.; \$6.00 per 100; \$50.00 per 1000.

Ilex. Holly

Ilex opaca. *American Holly.* A beautiful conical evergreen. The leaves are thick tough and very glossy, scalloped, and armed with spines, among which appear the ornamental red berries in Winter. Removing the leaves when transplanting, and planting in deep soil will cause it to grow well. 2 to 3 feet, 50c.; 3 to 4 feet, \$1.00.

DECIDUOUS TREES

For the Lawn, Park or Street

These offer wide variations in color and form, and as a tree may be regarded as a permanent investment. The effect desired should be carefully considered. Summer shade is the chief object of deciduous planting, but trees should also be selected for their brilliant Autumn coloring, and for grace of outline or color of bark after the leaves are gone. Most of our familiar shade trees are very accommodating, adapting themselves to a variety of situations, and no planter need fear that his conditions are too harsh for tree planting, but if there is any marked peculiarity in soil, situation or climate we should be glad to offer suggestions regarding the most desirable subjects.

Acer. Maple

Acer dasycarpum. *Silver Maple.* A tree of very rapid growth and spreading habit; extensively planted for ornament and shade, the silvery foliage rendering it very attractive. 8 to 10 feet, 75c.; 10 to 12 feet, \$1.00.

A. palmatum atropurpureum. *Japanese Maple.* The Japan Maple is unsurpassed for ornamental purposes. The variety offered, *Atropurpureum*, is the hardiest of the colored-leaved forms, and is more largely planted, the blood-red foliage making it a strikingly handsome and conspicuous tree. Trees are dwarf

Acer Schwedleri

in habit, seldom attaining a height of more than a few feet; compact and regular. It is hardly possible to convey a correct idea of their peculiar beauty. 2 feet, \$1.00.

A. platanoides. *Norway Maple.* One of the finest park, street, shade or lawn trees in America; of rounded form, compact habit, stout, vigorous growth, with large, handsome, broad leaves of deep, rich green which remain on the trees until late in the season. Decidedly one of the handsomest shade trees. 8 to 10 feet, \$1.00; 10 to 12 feet, \$1.50.

A. platanoides, var. Reitenbachii. *Reitenbach's Norway Maple.* Beautiful and striking because of its rich, changing foliage, which is soft green in Spring, decidedly purple in Midsummer, purplish scarlet in Autumn. Vigorous, pyramidal; valuable for contrasts. 6 to 7 feet, \$1.50 each.

A. platanoides Schwedleri. *Schwedler's Purple-Maple.* A beautiful variety, with the young shoots and leaves of a bright purplish or crimson color, which changes to purplish-green in the older leaves. One of the most valuable trees. 6 to 8 feet, \$1.50; 8 to 10 feet, \$2.00.

A. pseudo-platanus. *Sycamore Maple.* A noble and desirable tree for shade and ornamental purposes, with spacious head and large, dark green leaves. A rapid, upright, free grower, thriving in a great variety of soils. 8 to 10 feet, \$1.00; 10 to 12 feet, \$1.25.

A. pseudo-platanus purpurescens. *Purple-leaved Sycamore.* Leaves deep green on upper surface, purplish-red beneath, producing a beautiful color effect when leaves are in motion. Tree of robust habit; fine for lawns or for grouping with other foliage trees. 8 to 10 feet, \$1.25; 10 to 12 feet, \$1.50.

Acer platanoides. Norway Maple

ACER. MAPLE—Continued

A. rubrum. *Scarlet, or Red Maple.* A large, handsome tree, and common in the Eastern States. Planted singly on the lawn, it forms a handsome round-headed tree. Thrives best on lowlands, though it will do moderately well on dry soil. On account of its brilliant colored flowers in Spring and the various colors of the foliage in Autumn, it should be given a place in every lawn. 8 to 10 feet, \$1.00.

A. saccharinum Wieri. *Wier's Cut-leaf Silver Maple.* A remarkably beautiful and very graceful tree, of weeping habit and abundance of deep-green cut foliage. Tree a rapid grower and succeeds well on all soils. Shoots slender and drooping, giving the tree a decidedly graceful appearance. No other tree approaches it for beauty and gracefulness. As a single specimen on the lawn it cannot be surpassed. 8 to 10 feet, \$1.00; 10 to 12 feet, \$1.50.

A. saccharum. *Sugar, or Rock Maple.* Resembling in general appearance the Norway Maple, though more pyramidal in form, and a more rapid grower. Its upright habit of growth, dense shade and adaptability to different soils have rendered it one of the most extensively used. The Autumn effect of the foliage is particularly handsome. 8 to 10 feet, \$1.00; 10 to 12 feet, \$1.50; 12 to 14 feet, \$2.00.

Aesculus. Horse Chestnut

Aesculus hippocastanum. *White-flowering Horse Chestnut.* As an ornamental shade tree, the horse chestnut is highly recommended. The flowers are large, white, spotted with purple, and produced in large, compact spikes, making a showy appearance. A standard ornamental tree. 6 to 8 feet, \$1.00; 8 to 10 feet, \$1.50; 10 to 12 feet, \$2.00.

**Birch, Cut-leaved Weeping**

Æ. rubicunda. *Red-flowering Horse Chestnut.* In general appearance and in habit of growth it is very similar to the foregoing, the only noticeable difference being in the color of the flower, which is of a light red color. 4 to 5 feet, 75c.; 5 to 6 feet, \$1.00.

Betula. Birch

Betula alba laciniata pendula. *Cut-leaved Weeping Birch.* Beyond a doubt the most beautiful of all birches. Tall, slender, with graceful drooping branches, silvery white bark and delicately cut foliage. As a single specimen on the lawn, it is very desirable. 8 to 10 feet, \$1.50.

B. populifolia purpurea. *Purple-leaved Birch.* Foliage dark, resembling that of the purple beech; forms striking contrast with other trees. 4 to 5 feet, 75c.; 6 to 8 feet, \$1.50.

B. Youngi pendula. *Young's Weeping Birch.* A variety found trailing on the ground near Milford, England. When grafted it droops gracefully to the ground in fine, thread-like shoots. One of the most beautiful of the Weeping Birches. 4 to 5 feet, \$1.50; 5 to 6 feet, \$2.00.

**Catalpa Bungei—See page 10.**

Cornus florida. Great White Dogwood

Catalpa

Catalpa bignonioides nana Bungei. A highly ornamental tree, forming a perfect half-globular or umbrella head, clothed with a mass of large heart-shaped leaves of a deep green color, which overlap each other, forming a perfect roof. A striking and very ornamental tree upon the lawn. 5 to 6 feet, one year heads, \$1.00; 5 to 6 feet, 2 year heads, \$2.00; 6 to 8 feet specimens, 3 to 5 year heads, \$5.00 to \$8.00 each.

C. speciosa. *Western Catalpa.* A rapid-growing tree, with large, heart-shaped, pointed leaves. The flowers are large, fragrant and quite showy, appearing late in Spring in large, open, terminal panicles. Hardy and desirable. 6 to 8 feet, 50c.; 8 to 10 feet, 75c.

Cladrastis. Yellow-wood Tree

Cladrastis tinctoria. *Virgilia lutea.* *Yellow-wood.* A fine spreading tree of medium height, with smooth, gray bark like the beech and bright yellow wood. The white flowers, in long drooping clusters, resemble the bloom of the yellow locust. It is one of the most graceful flowering trees. 5 to 6 feet, 75c.

Cercis. Judas Tree

Cercis canadensis. *Red Bud, or Judas Tree.* A very ornamental native tree, of medium size, irregular rounded form, with perfect heart-shaped leaves of a pure green color. The tree derives the name of Red Bud from the profusion of delicate reddish-purple flowers with which it is covered before the foliage appears. Grown as single specimens they are also beautiful and attractive, and deserve to be classed among our finest ornamental trees. 3 to 4 feet, 50c.; 4 to 6 feet, \$1.50.

Cornus. Dogwood

Cornus florida rubra. *Red-flowered Dogwood.* One can hardly form an idea of the character of this strikingly beautiful flowering tree. The flowers, which appear early in May before the leaves, are of a deep rosy-pink color—a decided improvement upon the white variety, possessing the same freedom of flowering, producing a perfect drift of bloom. A decided acquisition to the list of flowering trees. It is an upright grower, with roundish head, foliage large, velvety, dark green in Summer and brilliant crimson in Fall. A handsome tree at all times. 2 to 3 feet, \$1.00; 3 to 4 feet, \$1.50.

CORNUS. Dogwood—Continued

C. florida. *White-flowered Dogwood.* Similar to the red flowering in habit of growth, though attaining larger proportions. When clothed in a mass of conspicuous white flowers in Spring it is indeed an object of beauty, and should be included in every collection. 3 to 4 feet, 50c.; 4 to 5 feet, 75c.; 5 to 6 feet, \$1.50.

Fagus. Beech

Fagus ferruginea. *American Beech.* One of the finest American trees, thriving best in a cool, moist soil. The leaves hold on until very late in Winter, the light brown foliage producing a pleasing effect when grouped among evergreens. 5 to 6 feet, \$1.50.

F. sylvatica heterophylla. *Fern-leaved Beech.* A tree of elegant, round habit, and delicately cut fern-like foliage. During the growing season its young shoots are like tendrils, giving a graceful, wavy aspect to the tree. 3 to 4 feet, \$2.00; 4 to 5 feet, \$2.50.

F. sylvatica incisa. *Cut-leaved Beech.* A fine, erect, free growing tree, with deeply incised foliage. Like the fern-leaved, a va-

**Fagus purpurea. Purple-leaved Beech**

riety of rare beauty and excellence. 2 to 3 feet, \$1.50; 3 to 4 feet, \$2.00.

F. sylvatica pendula. *Weeping Purple Beech.* One of the most curious and beautiful lawn trees. Irregular in outline, and has a picturesque beauty peculiar to itself. Its twisted and contorted branches resemble living fountains of foliage, rendering it indispensable as a specimen or in breaking up the regular outline of other trees. It is vigorous in growth and very desirable. 2 to 3 feet, \$1.00; 4 to 5 feet, \$2.50.

F. sylvatica purpurea. *Purple Beech.* One of the handsomest lawn trees, of graceful habit, attaining a height of forty to sixty feet. The foliage in Spring is a deep purple, changing later in the season to green. A desirable and beautiful tree, seldom attacked by insects. Should be closely pruned when transplanted. 3 to 4 feet, \$1.00; 4 to 5 feet, \$2.00; 5 to 6 feet, \$2.50.

F. sylvatica Riversii. *Rivers' Purple Beech.* The finest of all purple-leaved trees. When a large-growing tree with purple foliage is wanted, nothing equals this. Though it varies in intensity of color from early Spring until late Fall, the leaves are always a rich shade, sometimes crimson and sometimes almost black. 4 to 5 feet, \$1.75; 6 to 7 feet, \$2.50.

**Fagus sylvatica pendula. Weeping Beech**

Fraxinus. Ash

(See Sorbus.)

Fraxinus Ornus. *Flowering Ash.* Medium or low growth; foliage like that of the American Ash. Flowers in May or June, fringe-like, in large drooping clusters at the ends of the branches. An attractive and valuable ornamental tree. 8 to 10 feet, \$1.00.

Koelreuteria. Varnish Tree

Koelreuteria paniculata. *Varnish Tree.* From China. A hardy, small, round-headed tree, with fine lobed leaves and large panicles of showy golden yellow flowers, in the latter end of July; leaves change in Autumn to a fine yellow. One of the most desirable trees, particularly valuable for its brilliant, golden blossoms, which are produced so late in the season, when few if any trees are in bloom. 6 to 8 feet, 50c.

Larix. Larch

Larix decidua. *European Larch.* A conifer with deciduous needle-like leaves; bright green very early in Spring, and clear yellow in Autumn. Grows rapidly into a tall, pyramidal tree, with graceful drooping branches. 2 to 3 feet, 75c.; 3 to 4 feet, \$1.50; 4 to 6 feet, \$2.50.

Liquidambar. Sweet Gum

Liquidambar styraciflua. *Sweet Gum.* One of our most ornamental trees, somewhat resembling the Sugar Maple, but with more conical head and spreading branches. A rapid growing tree, and thriving in a great variety of soils. The leaves are roundish, but with five to seven pointed spreading lobes. In Autumn they assume a rich bronze color, and oftentimes change to crimson. Grows to a height of fifty to sixty feet. Well worth cultivating for ornament. 4 to 6 feet, 75c.; 6 to 8 feet, \$1.00.

Liriodendron.**Tulip Tree**

Liriodendron tulipifera. *Tulip Tree.* A popular native deciduous tree, belonging to the Magnolia family, sometimes attaining a height of seventy-five to one hundred feet. A rapid grower and very desirable for street planting. Valued for its clean, smooth bark and handsome green, foliage. The flowers, which are large, greenish-yellow and tulip-shaped, appear in June. Thrives in a variety of soils. 5 to 6 feet, 75c.; 6 to 8 feet, \$1.00.

Magnolia

Magnolia Alexandrina. Has large, light pink flowers resembling *Soulangeana*, but blooms earlier. 1½ to 2 feet, \$1.25; 2 to 3 feet, \$1.50.

M. conspicua. *Yulan.* In habit of growth similar to *Soulangeana*, but most esteemed of all on account of its large, pure white flowers, which are produced in great abundance the last of April. 2 to 3 feet, \$1.50; 3 to 4 feet, \$2.00.

M. glauca. *Sweet, or White Bay.* A well-known native tree, thriving best in low deep soil. Considered one of the most beautiful of ornamental small trees. Flowers are pure white and delightfully fragrant. 2 to 3 feet, 75c.

M. grandiflora. *Bull Bay.* The queen of American evergreen trees. Remarkable for the majesty of its form, the magnificence of its foliage and the beauty and fragrance of its flowers. The tree is of erect, compact growth, attaining a height of forty to sixty feet, and blooms when very young. The foliage is thick and leathery, brilliant glossy-green on the upper surface and rusty colored underneath. The flowers are immense, measuring eight to ten inches across, are of the purest white, and deliciously fragrant, filling the atmosphere with a sweet and pleasant aroma throughout nearly all the Summer months. 1 to 1½ feet, \$1.00; 1½ to 2 feet, \$2.00.

M. obovata. **M. discolor** and **M. purpurea.** *Purple Japan.* A low spreading bush, dark green leaves and flowers of pale purple color outside, shading to creamy-white within; young shoots and flower buds are sometimes injured north of Philadelphia. Very showy. 1 to 1½ feet, 75c., 2 to 2½ feet, \$1.50.

Magnolia Soulangeana—See page 13

MAGNOLIA—Continued

M. Soulangeana. *Soulange's Magnolia.* A low spreading tree, covered early in the Spring, before the leaves appear, with an abundance of large flowers, purple at the base and white in the upper half of the petals, and appearing in such quantities as to completely cover the tree. One of the most showy and popular of our flowering trees. Should be planted early in Spring. 2 to 3 feet, \$1.00; 3 to 4 feet, \$1.50.

M. Soulangeana Lennei. *Lenne's Magnolia.* A very showy flower, cup-shaped, crimson-purple outside, and pearl-colored within. Finest of the Purple Magnolias. 1 to 1½ feet, \$1.00; 2 to 2½ feet, \$2.00.

M. Soulangeana speciosa. *Showy-flowered Magnolia.* Resembles the *Soulangeana* in growth and foliage, but the flowers are a little smaller and of a lighter color, fully a week later, and remain in perfect condition upon the tree longer than those of any other Chinese variety. These qualities, combined with its hardiness, render it one of the most valuable sorts. 2 feet, \$1.50.

M. stellata syn. Halleana. *Hall's Japan Magnolia.* A dwarf tree from Japan. Its form is low and shrub-like; its flowers are pure white; the petals are long, narrow, and arranged in double rows, and the fragrance is delicate. It blooms earlier than any other Magnolia, and is very showy. 2 feet, \$1.50.

Morus. Mulberry

Morus alba pendula. *Teas' Weeping Mulberry.* (See 1st page of cover.) The most graceful and hardy weeping tree in existence. Wholly unlike anything heretofore introduced. Forms a perfect umbrella-shaped head, with long, slender, willowy branches, drooping to the ground. All who have seen it agree that in light, airy gracefulness, delicacy of form and motion it is without a rival. It has beautiful foliage, is wonderfully vigorous and healthy; is one of the hardiest, enduring the cold of the North and the heat of the South; safe and easy to transplant. Admirably adapted for ornamenting small or large grounds, or for cemetery planting. 1 year heads, \$1.00; 2 year heads, \$2.00; large specimens, \$3.00 to \$5.00.

Paulownia. Empress Tree

Paulownia imperialis. *Empress Tree.* A popular ornamental tree on account of its large tropical-looking leaves and handsome trumpet-shaped violet flowers, borne in upright branching panicles. A hardy and rapid grower. 4 to 5 feet, \$1.00; 5 to 6 feet, \$1.50.

Platanus. Plane Tree

Platanus orientalis. *Oriental Plane. But-tonwood.* A favorite tree for avenue planting, of large spreading habit and rapid growth, attaining a height of fifty to seventy feet, and not affected by insects. Leaves large, smooth and handsome, affording abundant shade. Thrives in high or low ground, and cannot be too highly recommended where a large rapid-growing tree is desired. 8 to 10 feet, \$1.00; 10 to 12 feet, \$1.50; 12 to 14 feet, \$2.00.

Populus. Poplar.

Populus alba. *Abele, or White Poplar.* The Poplars are all large, rapid growing trees, and will thrive in any soil. The leaves are on slender

Liriodendron tulipifera. Tulip Tree.—See page 12

foot-stalks and easily stirred by the wind, when the white underside is shown and produces a fine effect. 6 to 8 feet, 75c.; 8 to 10 feet, \$1.00; bush form, 50c.

P. nigra fastigiata var. italica. *Lombardy Poplar.* Its tall fastigiate form, sometimes reaching 120 feet, makes it indispensable in landscape effects for breaking monotony of outline. Its growth is very rapid. 8 to 10 feet, 75c.; 10 to 12 feet, \$1.00.

Quercus. Oak

Quercus coccinea. *Scarlet Oak.* This is perhaps the most esteemed of all oaks. Not only does it make a large, well-shaped tree, but in the Fall the foliage changes to a brilliant scarlet. It makes a fine street or avenue tree. 5 to 6 feet, \$1.00; 7 to 8 feet, \$1.50; 8 to 10 feet, \$2.00.

Q. macrocarpa. *Mossy Cup, Burr Oak.* One of the most beautiful of oaks, of massive, open growth, and with large, heavy leaves. The acorns are of the largest size. An interesting feature is the mossy cup which holds the acorn, not to mention its corky bark. 5 to 7 feet, \$1.00; 7 to 9 feet, \$1.50.

Q. palustris. *Pin Oak.* Foliage deep green and finely divided. As the tree grows the lower branches droop, till they almost touch the ground. The leaves become of a scarlet and yellow color in Autumn. A splendid avenue tree—in fact, we highly recommend it for every purpose, as few trees are prettier than a lawn specimen of this oak. It thrives in almost any soil, and stands the test of city street planting. 8 to 10 feet, \$1.50; 10 to 12 feet, \$2.00; 12 to 14 feet, \$2.50.

Salisburia. Maidenhair Tree or Ginkgo

Salisburia adiantifolia Ginkgo biloba. One of the oddest and peculiar of all hardy exotic trees. Its leaves are deciduous, fan-shaped, broad and notched, resembling those of the Maidenhair Fern. Useful and ornamental for avenue planting, perfectly hardy, attaining a height of sixty to eighty feet, if not pruned. 5 to 6 feet, 50c.; 6 to 8 feet, 75c.; 8 to 10 feet, \$1.50.

Salix. Willow

Salix babylonica. Weeping Willow. This is the well-known Weeping Willow, whose long, pendulous branches droop so gracefully, and sway

to the lightest breeze. Makes an admirable shade tree and grows well in wet or dry places. 8 to 10 feet, \$1 each.

Sophora. Pagoda Tree

Sophora japonica. Japan Pagoda Tree. A shrub of medium size, with light-colored, soft foliage and racemes of small, bell-shaped cream-colored flowers. It is sometimes grown as a small tree. 3 to 4 feet, \$1.00; 4 to 5 feet, \$1.50.

Sorbus. Mountain Ash (See Fraxinus.)

Sorbus Aucuparia. European Mountain Ash. A handsome native tree, thriving in a great variety of soils and conditions; beautiful when in fruit or flower. In Autumn and early Winter the tree is clothed with large clusters of red berries, rendering it very conspicuous. 6 to 8 feet, 75c.; 8 to 10 feet, \$1.00.

Platanus orientalis. Oriental Plane—See page 13

Tilia. Linden

Tilia europæa. European Linden. Medium growth, eventual size very large, leaves smaller and darker than those of the American Linden, in great profusion, forming a dense shade; outline regular and conical. One of the most ornamental of trees, growing in almost any soil, and adapted to lawn or avenue. 8 to 10 feet, \$1.25; 10 to 12 feet, \$1.50.

Ulmus. Elm

Ulmus americana. American Elm. One of the finest street shade trees in the world; its gracefully spreading branches, assuming a graceful arching growth over driveways, afford abundant shade. 8 to 10 feet, \$1.00; 10 to 12 feet, \$1.75.

NURSERY INSPECTION

My nurseries are inspected annually by the State Entomologist. To each and every shipment of my stock is attached a certificate of inspection testifying to its freedom from Scale and other diseases.

DECIDUOUS SHRUBS

Althaea. Rose of Sharon

Althaea, or Rose of Sharon. Fine assortment of named varieties. 3 to 4 feet, 25c each.

Amorpha. Lead Plant

Amorpha canescens. *Lead Plant.* June. Blue flowers, borne abundantly in terminal clusters. Dense habit, adapted to rockeries and shrubbery borders. 1 to 2 feet, 25c. each.

Andromeda. Wild Rosemary

Andromeda. *Wild Rosemary. Mariana, or Lily of the Valley Shrub.* A beautiful flowering shrub of very low growth, bearing great panicles of lovely, drooping, bell-like blossoms. It is perfectly hardy and flowers profusely in any situation. 1 to 2 feet, 35c. each.

Azalea

Azalea amena. Dwarf bushy shrub; covered in Spring with masses of purplish-red double flowers. One of the choicest evergreen shrubs. 75c. each.

A. Ghent Varieties. Pretty shrubs; nearly every shade of color. 75c. each.

A. mollis. This is a species from China. One of the most attractive flowering shrubs introduced from that country. It is of comparative dwarf bush-like habit, with light green leaves. The flowers are as large as the Indian Azaleas, usually seen in greenhouses. There are but two colors of it, yellow and red, and they expand about the middle of May. We know of no other flowering shrub to equal them in attractiveness, and when massed in a large bed they create a particularly beautiful spot on the lawn. 75c. each.

Buddleia

Buddleia intermedia. Violet-colored flowers in slender arching pendulous racemes. A most charming and graceful plant. 25c. each.

B. variabilis. Introduced from Thibet; leaves long and whitish; very long clusters of reddish-violet flowers, sweet-scented; beautiful shrub. 25c. each.

Azalea amoena

Berberis Thunbergi

Berberis. Barberry

Berberis purpurea. *Purple-leaved Barberry.* An interesting shrub, growing 3 to 5 feet high, with violet-purple foliage and fruit; blossoms and fruit beautiful. Very effective in groups and masses, or planted by itself. 2 to 3 feet, 35c. each.

B. Thunbergi. Equally beautiful for bordering groups of larger shrubs, forming low hedges, planting around house foundations, etc. In late Autumn, when most other shrubs are bare, the small, oval leaves of this broad, picturesque little bush color up to vivid crimson, and until Mid-winter it is bright and handsome with scarlet berries. 1½ to 2 feet, 25c. each; 2 to 3 feet, 50c. each.

Calycanthus. Sweet Shrub

Calycanthus floridus. *Sweet Shrub.* The oddly formed, double flowers are a rare chocolate color and have a peculiar agreeable odor. They are borne in the axils of the leaves all along the branches in June. A common shrub in old gardens. 2 to 3 feet, 35c. each.

Caragana. Siberian Pea

Caragana arborescens. *Siberian Pea Tree.* May. Bright yellow pea-shaped flowers and graceful pinnate leaves. Well adapted to shrubberies. 3 to 4 feet, 35c. each.

Ceanothus. New Jersey Tea

Ceanothus americanus. *Jersey Tea.* A small shrub, with a profusion of white flowers, which are in crowded panicles and appear in June. One of the best shrubs for shady places, the borders of woods or similar situations. 1 to 2 feet, 35c. each.

Chionanthus. White Fringe

Chionanthus virginica. White Fringe. Another very desirable large-growing shrub, bearing racemes of fringe-like white flowers, in latter May. Its purple fruit, too, is highly ornamental, as is also its lustrous deep green foliage. 3 to 4 feet, 50c. each.

Clethra. Sweet Pepper Bush

Clethra alnifolia. A native shrub of low and dense growth; leaves abundant and light green; has numerous spikes of small white fragrant flowers in July. 1 to 2 feet, 35c. each.

Colutea. Bladder Senna

Colutea arborescens. Bladder Senna. Large shrub of compact growth, small light green, acacia-like foliage, yellow or yellowish red pea blossom-shaped flowers in June and July, followed by reddish pods or bladders; hardy and suited to any soil. 2 to 3 feet, 35c. each.

Cornus. Dogwood

Cornus Spaethi. Golden-leaved Dogwood. Similar to *C. sanguinea variegata*, except in this we have yellow instead of white variegation. The markings of both are constant during the Summer. 1 to 2 feet, 35c. each.

Cytisus. Golden Chain

Cytisus Laburnum. Golden Chain. A dwarf tree or large shrub with shining green leaves and racemes of yellow flowers, which appear in early Summer. This shrub is well appreciated and much used in England. It will be as popular here when its beauty and effectiveness are better known. 2 to 3 feet, 35c. each.

Desmodium. Bush Clover

Desmodium pendulifolium. Graceful pendulous habit, growing from the ground every year; branches studded with reddish violet pea-shaped flowers in late Summer and Autumn. 35c. each.

Deutzia

Deutzia candidissima flore pleno. Double White-flowering Deutzia. Abundant racemes of flowers in June, luxuriant foliage and fine habit. 2 to 3 feet, 35c. each.

D. crenata var. flore pleno. Double-flowered Deutzia. Flowers double white, tinged with rose. One of the most desirable flowering shrubs in cultivation. 2 to 3 feet, 25c. each; 3 to 4 feet, 35c. each.

D. gracilis. This species differs from the rest in being of a quite dwarf, bushy habit. The racemes of white flowers completely cover the plant, making it one of the most attractive shrubs of the season—May. It is largely used for forcing in greenhouses, blooming then about Easter. 1 to 2 feet, 35c. each.

D. gracilis aurea. Golden Variegated Deutzia. In habit of growth similar to *gracilis*, but with golden foliage. Being dwarf in habit is very desirable for shrub borders. 1 to 2 feet, 35c. each.

D. Lemoinei. Single white. A hardy hybrid, partaking to a great extent of the character of *D. gracilis*, but of stronger growth. Good for forcing. 3 to 4 feet, 35c. each.

D. Pride of Rochester. Double white, tinged pink. 3 to 4 feet, 35c. each.

Exochorda. Pearl Bush

Exochorda grandiflora. A hardy flowering shrub, native of the mountainous districts of China and Japan. A certain and profuse bloomer in the early Summer. 2 to 3 feet, 25c. each; 3 to 4 feet, 35c. each.

Forsythia. Golden Bell

Forsythia. The yellow flowers are produced very early in Spring before the leaves appear, making this an attractive species where early bloom is desired. A shrub worthy of extensive planting. 2 to 3 feet, 25c. each; 3 to 4 feet, 40c. each.

Hamamelis. Witch Hazel

Hamamelis virginica. Witch Hazel. Tall shrub, oval leaves like the Hazel, slightly downy; yellow flowers remarkable for their appearance late in Autumn, just as the leaves are turning and about to fall. 2 to 3 feet, 35c. each.

Deutzia crenata

Hydrangea

Hydrangea arborescens sterilis. *Snowball Hydrangea.* This magnificent, perfectly hardy American shrub is the very finest addition to this class of plants in many a year. The snow-white blooms are of largest size, the form of the panicle much like that of *Hydrangea Hortensia*. The habit of the plant is excellent, the foliage finely finished, lacking entirely the coarseness of *Hydrangea paniculata grandiflora*. One of the most valuable characteristics is its coming into bloom just after the passing of all the early Spring shrubs, while its long flowering season, from early June to late August, makes it a valuable acquisition in any garden. (See cut.) Price, strong plants, 2 to 3 feet, 50c. each.

H. paniculata grandiflora. *New Japan.* This is one of the most showy shrubs in cultivation, with immense pyramidal panicles of white

Hydrangea arborescens sterilis

flowers more than a foot long, which change to pink. Very ornamental from Midsummer until destroyed by frost. Should be in every garden. Strong plants, 25c. each, \$2.50 per doz.; extra heavy, 50c. each, \$5.00 per doz.; tree form, 50c. each.

Hypericum. St. John's Wort

Hypericum densiflorum. A new shrubby Hypericum, bearing in great profusion throughout the Summer golden yellow flowers an inch in diameter. A desirable addition to the list of hardy shrubs, as few others flower at the same season. 2 to 3 feet, 35c. each.

Kalmia. Mountain Laurel

Kalmia latifolia. *Mountain Laurel.* A nevergreen of stronger growth and larger leaves than the *K. angustifolia*. A magnificent plant, rivaling the rhododendron in beauty. Flower buds of a delicate pink, changing to white as they expand, and with advancing age. An abundant bloomer in June. It is a great evergreen plant for massing, and will grow best in woodland or under a border of trees. Plants, 50c. to \$2.00 each.

Hydrangea paniculata grandiflora

Kerria. Globe Flower

Kerria var. argentea variegata. *Silver Variegated-leaved Corchorus.* A dwarf variety from Japan, with small, green foliage, edged with white; very slender grower. One of the prettiest and most valuable of dwarf shrubs. 35c. each.

K. var. flore pleno. *Double-flowered Corchorus.* Of medium size; double yellow flowers. 35c. each.

K. japonica. *Japan Corchorus.* A slender, green-branched shrub, 5 or 6 feet high, with globular, yellow flowers from July to October. 35c. each.

Rhododendron

Lespedeza

Lespedeza bicolor. Very distinct for its fine foliage and purple-red flowers. 35c. each, \$3.50 per doz.

Mahonia. Evergreen Barberry

Mahonia aquifolium. *Holly-leaved Mahonia.* Medium-sized, shining, purplish-green, prickly leaves and showy bright yellow flowers. 50c. each.

Philadelphus. Mock Orange

Philadelphus coronarius. *Mock Orange.* A valuable, hardy shrub, with handsome foliage and beautiful white flowers, some varieties of which are quite fragrant. 3 to 4 feet, 35c. each.

Spiraea Van Houttei—See page 19

P. foliis aureis. *Golden-leaved Syringa.* A very pretty plant of medium size, of golden-yellow foliage. It keeps its color the entire season, and will be found valuable for creating pleasing and striking contrasts with purple-leaved shrubs. 3 to 4 feet, 35c. each.

P. grandiflorus. Has very showy large flowers, slightly fragrant. Forms a large spreading bush with graceful drooping branches. 2 to 3 feet, 25c. each; 3 to 4 feet, 35c. each.; 4 to 5 feet, 50c. each.

Rhododendrons

Rhododendrons. Of all decorative hardy plants the most valuable. They require simply good garden soil, which should be dug 30 to 36 inches deep and mixed with peat. Protect with leaves or brush during Winter. 15 to 18 inches, \$1.00 each; 18 to 24 inches, \$1.50 each; 24 to 36 inches, \$2.50 each.

Rhodotypos. White Kerria

Rhodotypos kerrioides. A pretty new shrub, bearing white flowers on the ends of its twigs. It commences to bloom about May 15th, and continues for a long while. 1 to 2 feet, 35c. each.

Rhus. Sumach

Rhus Cotinus. *Purple Mist, or Smoke Tree.* Has very curious bloom, which, when covered with dew, resembles a cloud of smoke or mist. Singular and beautiful. 2 to 3 feet, 35c. each; 3 to 4 feet, 50c. each.

Spiraea

Spiraea Anthony Waterer. A new hardy variety from England. It is of dwarf, dense habit, bearing a profusion of peculiar crimson flowers, blooming the entire Summer. 2 to 3 feet, 25c. each.

S. arguta. A species new in cultivation, and already very popular. Its sprays of showy white flowers are considered at least the equal of any other *Spiraea*. The leaves are quite small. 2 to 3 feet, 35c. each.

S. callosa. Flowers pink and in large flat heads. Blooms the first week in July, and continues for several weeks. 35c. each.

S. callosa alba. The same as *S. callosa*, but with a very dwarf growth; white flowers. 35c. each.

S. opulifolia aurea. Foliage distinctly yellow, rich and massive looking. Flowers white. Effective large shrub for lawns. 3 to 4 feet, 35c. each.

S. prunifolia. *Bridal Wreath.* The pretty double white flowers are in bunches of twos and threes all along the almost leafless stems. They usually expand about May 1st, just as the leaves are budding. 3 to 4 feet, 35c. each.

S. Reevesii. A charming shrub with narrow-pointed leaves and large, round clusters of white flowers that cover the whole plant. 3 to 4 feet, 35c. each.

S. rosea superba. All Summer. The bright light rose-colored flowers alone distinguish it from the foregoing. 2 to 3 feet, 35c. each.

S. Thunbergi. *Thunberg's Spiraea.* Of dwarf habit and rounded, graceful form; branches slender and somewhat drooping; foliage narrow and yellowish-green; flowers small, white, appearing early in Spring, being one of the first *Spiræas* to flower. Esteemed on account of its neat, graceful habit. Forces well in Winter. 3 to 4 feet, 35c. each.

S. Van Houttei. This handsome species is perhaps the most popular and desirable of all *Spiræas*. Flowers pure white, produced in great abundance and exceedingly beautiful. The plant is a very strong, robust grower. 3 to 4 feet, 35c. each.

Syringa. Lilac

Syringa. *Charles X. Lilac.* A strong, rapid-growing variety, with large, shining leaves; trusses large, rather loose, reddish-purple. 50c. each.

S. Japonica. *Japan Lilac.* Found on the mountains of Japan, where it attains a height of 25 or 30 feet, with a stem 12 inches in diameter. Leaves large, deep glossy green; large clusters of elegant fragrant flowers appear late in the season. Quite hardy here. 3 to 4 feet, 50c. each.

S. Josikæa. *Josika's, or Chionanthus-leaved Lilac.* A fine, distinct species of tree-like growth, with dark, shining leaves and purple flowers in June, after the other lilacs have done flowering. Esteemed particularly for its fine habit and foliage. 3 to 4 feet, 35c. each.

S. persica. *Persian Lilac.* Purple. A profuse and early blooming sort, bearing light purple flowers. Valuable. 3 to 4 feet, 35c. each, \$2.50 per 10.

S. persica alba. *White Persian Lilac.* Same habit and form as the preceding, but almost white flowers. 2 to 3 feet, 35c. each, \$2.50 per 10.

S. vulgaris. *Common Lilac.* The commonest purple species, and one of the best. A good grower. Flowers and young leaves fragrant. 2 to 3 feet, 25c. each.

Viburnum plicatum—See page 20

Tamarix. Tamarisk

Tamarix africana. *African Tamarisk.* Pink flowers in June. Should be cut back and formed immediately after it blooms to obtain flowers another year. 3 to 4 feet, 35c. each.

T. indica. *Indian Tamarisk.* Blooms in August. Very strong-growing, feathery and waving in aspect. 3 to 4 feet, 35c. each.

Viburnum. Snowballs

Viburnum lantanoides. *Wayfaring Tree.* A tall shrub, bearing red and black fruit in late Summer before other Autumn-fruiting plants have become conspicuous. The white flowers are borne in large clusters in May, and the large soft heavy leaves hang on very late. 2 to 3 feet, 35c. each.

V. plicatum. *Japanese Snowball.* Few shrubs combine in one plant so many desirable features as does the Japanese Snowball. It is one of the first to expand its leaves in the Spring; it retains its color all through the Summer, even when hot and dry, and is the last plant to shed its foliage in the Fall. The leaves are of a rich olive-green, and the young shoots and leaves are of a copper color. The flowers are of large size and are produced in great abundance. They are pure white, and as the stems are somewhat stiff the balls all face upward. The bush is a free grower, compact in growth and of good shape. 2 to 3 feet, 50c. each.

Weigela rosea

V. sterilis. *American Snowball.* An old-fashioned shrub, highly esteemed for its large, globular heads of pure white sterile flowers. A hardy and profuse bloomer. 2 to 3 feet, 35c. each.

V. tomentosum. *Single Japan Snowball.* May. An elegant shrub with beautiful dark green leaves. The white flowers borne in flat clusters, are followed by decorative red berries that later change to black. Valuable in shrubberies. 2 to 3 feet, 35c. each.

Weigela. Diervilla

Weigela amabilis, or splendens. Of robust habit, large foliage and pink flowers; blooms freely in the Autumn; distinct and beautiful. 3 to 4 feet, 35c. each.

W. candida. This is the best of all the white-flowering Weigelas. A strong, upright, erect grower; flowers pure white and produced in great profusion in June and continues to bloom through the entire Summer. 3 to 4 feet, 35c. each.

W. Eva Rathke. A popular new kind of erect form and vigorous habit. The deep carmine-red flowers are the best of the red-flowering sorts. 2 to 3 feet, 35c. each.

W. rosea. *Rose-colored.* An elegant shrub, with fine rose-colored flowers, introduced from China by Mr. Fortune, and considered one of the finest plants he has discovered. Blossoms in May. 3 to 4 feet, 35c. each.

W. sessifolia syn. lutea. July. A Native shrub of strong growth, and terminal clusters of yellow flowers; hardy in Canada. Desirable in shrubberies on account of its attractive foliage, which turns a reddish brown. 3 to 4 feet, 50c. each.

W. Sieboldi variegata. A grand shrub of rather dwarf habit, and silvery variegated leaves which stand the sun well. When covered in July with its beautiful bright pink flowers it is indeed very beautiful. 2 to 3 feet, 35c. each.

Yucca

Yucca filamentosa. *Adam's Needle.* Stem short and leafy, with green or glaucous, long-linear leaves, having numerous thread-like filaments along the margins. The tall flower-stems lift a panicle of creamy-white flowers. It is very hardy and fine. 25c. each.

Hedge of California Privet

LANDSCAPE GARDENING

To obtain desirable and most pleasing results in ornamental tree planting, one should have a knowledge of the character and habits of trees and plants, and be able to picture in your mind the appearance of the work when completed, and what the result will be in after years when trees have attained maturity. A few suggestions as to the arrangement may be of value to the prospective planter, and from those wishing to improve old estates, or lay out new grounds, and not having personal experience as to the best methods, I invite correspondence.

Plans, specifications, and estimates will be cheerfully furnished, and the work of planting skillfully executed.

CALIFORNIA PRIVET

Beautify Your Surroundings! Remove the unsightly fence; *enhance the value of your property* by planting a *California Privet Hedge*, the most remarkable, desirable and popular ornamental hedge-plant in existence. It is recognized as the ideal hedge-plant, thriving in all soils, situations and under all conditions, in lowland or upland, in sun or in shade, under the drip of trees, in poor soil almost as well as in rich. *Especially adapted to seashore planting*, where it luxuriates and grows in all its vigor, the salt air giving the foliage a vivid green coloring.

The plant is a remarkably vigorous grower, compact and regular in form, with a beautiful shade of green, glossy, wax-like foliage, which it retains throughout the season and well into the Winter; and in sheltered locations is almost an evergreen, the new leaves putting forth as the old ones fall.

The plant is perfectly hardy, easily transplanted and of very easy culture, growing more beautiful as it grows older. A plant admirably adapted for division lines, as it may be kept shorn to any desired height or width.

A hedge of California Privet is decidedly more ornamental and in many ways more desirable than the ordinary fence, which is a constant expense. The hedge requires no repairing, no painting, in fact no expense whatever, and is more impenetrable at two years after planting than the ordinary fence. When once planted it stands for a life-time, making a lasting monument to the memory of him who plants.

The plants I offer have been grown a good distance apart in the rows, were cut back to the ground one year after planting, are stocky, well branched, and a very superior lot, and should not be compared with the tall, spindling things usually offered.

PRICES: 12 to 18 inches, \$3.00 per 100, \$25.00 per 1000; 2 to 3 feet, \$4.00 per 100, \$35.00 per 1000; 18 to 24 inches, \$3.50 per 100; \$30.00 per 1000; 3 to 4 feet, \$6.00 per 100; \$50.00 per 1000.

Bush Privet. Large specimen plants, suitable for screens, or as single specimens on the lawn. 4 to 5 feet high, 3 feet across, \$1.00 each; 3 feet high, 2 feet across, 50c. each.

Chinese Privet. *Ligustrum Ibota*. One of the hardiest privets, and very distinct, with handsome, long, glossy foliage and large pure white fragrant flowers in great profusion in June, followed by bluish black seeds in clusters, which remain upon the plant until Spring. 2 to 3 feet, 25c. each; 3 to 4 feet, 50c. each, \$2.00 per doz.

Golden Privet. *Ligustrum ovalifolium aureum elegantissimum*. This is the true Japanese Golden variety, and is without doubt the most beautiful golden shrub in cultivation. Not such a strong growing variety as the California Privet, but very desirable for formal and terrace gardening. Fine well-rooted plants. 12 to 15 inches high, 50c. each, \$5.00 per doz., \$35.00 per 100; 15 to 18 inches high, 75c. each, \$8.00 per doz., \$50.00 per 100.

Hedges skillfully planted by the lineal yard and growth guaranteed, at moderate prices. Write for estimate.

HARDY CLIMBING VINES

Akebia

Akebia quinata. A rapid-growing Japanese vine, with five-fingered leaves of a beautiful glossy green, and small chocolate-colored, sweet-scented flowers. It is almost an evergreen. 25c. each.

Ampelopsis. Ivy Creepers

Ampelopsis Veitchii. *Boston Ivy.* This is one of the finest climbers we have for covering walls, as it clings firmly to the smoothest surface, covering it smoothly with overlapping foliage, giving it the appearance of being shingled with green leaves. The color is a fresh deep green in Summer, changing to the brightest shade of crimson and yellow in Autumn. It is quite hardy and becomes more popular every year. Extra strong, 25c. each.

Aristolochia. Dutchman's Pipe

Aristolochia siph. *Dutchman's Pipe.* A robust, hardy vine, with very large heart-shaped leaves, and brownish flowers resembling miniature pipes. Plant a strong, rapid grower and very desirable. 50c. each.

Clematis

Clematis graveolens. The best of the yellow flowering Clematis. Plant perfectly hardy, free growing and graceful. The yellow flowers are produced quite freely in August, and when planted near the Clematis paniculata the effect is very striking. 25c. each, \$2.50 per doz.

C. Henryi. In habit of growth, size of flower, hardness, etc., it resembles the Jackmanni, the only difference being in the color of the flower, which is a beautiful creamy white. 50c. each.

C. Jackmanni. A handsome climbing vine of slender twining growth, producing clusters of handsome, showy blue flowers five to six inches in diameter. A rare and beautiful variety and extensively planted. 50c. each.

C. Madame Edouard Andre. This is the nearest approach to a large red Clematis and has been called the Crimson Jackmanni. The plant is a strong, vigorous grower, and very free in bloom. Color a distinct crimson red. 50c. each.

C. paniculata. A valuable white variety, native of Japan; clear green foliage, pure white flowers from three-quarters to an inch in diameter, star-shaped and very fragrant, borne in clusters on stiff stems four to six inches long. Very desirable, rapid-growing, free, late bloomer. Strong two-year plants from open ground. 25c. each; extra, 35c.

Dolichos. Kudzu Vine

Dolichos japonicus. *Kudzu Vine.* An extremely valuable vine, rapidly covering everything in one season. The stiff racemes of rosy-purple flowers are beautiful, filling the air with fragrance. The vine is perfectly hardy, grows to a height of one hundred feet if permitted, and is well filled with dense foliage close to the ground. Blooms in August. 50c. each.

Euonymus

Euonymus radicans variegatus. An excellent little self-clinging vine, suitable for covering walls, stumps or rockeries or wherever a vine of slow growing habit is desired. Leaves small and variegated. 25c. each.

Hedera. English Ivy

Hedera helix. *English Ivy.* This is well known, and its broad, glossy, dark leaves retain their beauty all Winter if planted on the eastern and northern sides of buildings away from the sun. It is hardy here. 25c. each.

Honeysuckle. Lonicera

Honeysuckle. *Hall's Japan.* One of the sweetest and most beautiful Honeysuckles; a strong, clean, neat grower, perfectly hardy, almost evergreen; constant and most profuse bloomer; flowers deliciously sweet; fine for porches and all similar places. 25c. each, \$2.50 per doz.

H. Japan Golden. Slender, moderate grower; leaves beautifully veined and netted with clear yellow, so that prevailing color of the foliage is bright yellow; flowers yellow and sweet-scented; fine for pillars and trellises. 25c. each, \$2.50 per doz.

Tecoma. Trumpet Vine

Tecoma grandiflora. Large-flowered Trumpet Creeper. A rare and beautiful variety of the Trumpet Creeper. Flowers very large, salmon color, center yellow, striped red; fine. 35c. each.

Wistaria

Wistaria sinensis. A vigorous growing vine, producing long, pendulous clusters of pale blue flowers. A remarkably hardy and very beautiful climber, surpassed by none. 50c. each.

W. sinensis alba. In habit of growth this variety is identical with the foregoing, except in color of flower, which is pure white and decidedly fragrant. Vine hardy and graceful. 50c. each.

ORNAMENTAL GRASSES

Eulalia

Eulalia gracillima univittata. Foliage exceedingly graceful, narrow, delicate green, with silvery white midrib. Quite hardy. Price, mail or express, 15c. each, four for 50c.; large clumps, 50c.

E. japonica variegata. Long, narrow leaves, bordered with white. Hardy. Plumes like Pampas Grass. Price, mail or express, 15c. each, four for 50c.; large clumps, 50c.

E. japonica zebrina. *Zebra Grass.* Markings are yellow and across the leaves. Price, mail or express, 15c. each, four for 50c.; large clumps, 50c.

Erianthus

Erianthus Ravennæ. Much resembles the Pampas Grass; height eight to ten feet. Price, mail or express, 15c. each, four for 50c.; large clumps, 50c.

HARDY PERENNIALS

Perennials are now becoming quite popular, and by planting a few choice varieties continuous bloom may be had from early Spring until Autumn. Plant in the Fall, or as early as possible in the Spring, in any good garden soil.

Achillea

Achillea millefolium rosea. Pink; blooms and flowers entire Summer. 15c. each, \$1.50 per doz.

A. The Pearl. *Milfoil.* Pure white flowers; blooms entire Summer.

Anemone

Anemone japonica. Commence to flower in August. 15c. each, \$1.50 per doz.

Aquilegia

Aquilegia chrysantha. *Columbine.* Golden yellow flower; blooms May or June.

A. vulgaris fl. pl. Best mixed of double sorts, red, white and blue. 15c. each, \$1.50 per doz.

Aster

Asters. *Michaelmas Daisy.* Hardy, flowering in the Fall; best varieties. 15c. each, \$1.50 per doz.

Baptisia

Baptisia australis. *False Indigo.* A strong growing plant, about two feet high; suitable either for the border or wild-garden, with dark green, deeply cut foliage, and spikes of dark blue flowers in June and July. 15c. each, \$1.50 per doz.

B. tinctoria. Produces spikes of bright yellow flowers during June and July; two to three feet high. 15c. each, \$1.50 per doz.

Bocconia

Bocconia cordata. *Plum Poppy.* A hardy perennial, beautiful foliage and creamy white flowers; blooms during July and August. 15c. each, \$1.50 per doz.

Campanula

Campanula rotundifolia. *Harebell.* *Bluebells of Scotland.* Clear blue flowers from July to August, and is of branching habit. 15c. each, \$1.50 per doz.

Caryopteris

Caryopteris mastacanthus. *Blue Spiraea.* A handsome hardy perennial from China. Grows about three feet high and produces flowers in great profusion the whole length of its branches. The color is a rich lavender-blue. A valuable plant either for bedding or pot culture, blooming continuously from early in September until cut by frost. 25c. each, \$2.50 per doz.

Coreopsis

Coreopsis lanceolata grandiflora. An old favorite with yellow flowers; blooms most of the Summer. 15c. each, \$1.50 per doz., \$10.00 per 100.

Delphinium

Delphinium chinensis. *Hardy Larkspur.* A very pretty variety; flowers vary in color through all the lighter shades of blue to almost white.

D. formosum. The best of hardy Larkspurs; deep blue flowers with white center. And other varieties. 15c. each, \$1.50 per doz.

Dianthus

Dianthus

Dianthus barbatus. *Sweet William.* A great favorite; mixed colors, double and single. 10c. each, \$1.00 per doz.

D. latifolius atrococcineus. Produces throughout the Summer and Fall fiery crimson flowers not unlike the Sweet William. A most desirable bedding plant. 15c. each, \$1.00 per doz., \$8.00 per 100.

D. plumarius. Old-fashioned hardy garden pink. 10c. each, \$1.00 per doz.

Digitalis

Digitalis gloxiniaeflora. *Forglove.* A fine variety with flowers from pure white to pink. 15c. each, \$1.50 per doz.

Funkia

Funkia coerulea. *Day Lily.* Beautiful blue flowers; blooms in September. 15c. each, \$1.50 per doz.

F. subcordata grandiflora. Pure white fragrant flowers, in large clusters. 15c. each, \$1.50 per doz.

Gaillardia

Gaillardia grandiflora. A very handsome perennial with showy yellow and crimson flowers; blooms during the entire season. 15c. each, \$1.50 per doz.

Helenium

Helenium grandicephalum striatum. A beautiful perennial plant with flowers of a deep orange blotched with crimson; July and August. 15c. each, \$1.50 per doz.

Helianthus

Helianthus Maximiliani. *Hardy Sunflower.* A tall, graceful, single-flowered variety; late in September and October.

H. multiflorus fl. pl. A beautiful yellow double variety; blooms from July to September. 15c. each, \$1.50 per doz. Set of eight varieties for \$1.00.

Hemerocallis

Hemerocallis fulva. *Yellow Day Lily.* A useful plant with large yellow flowers; blooms in July and August. 15c. each, \$1.50 per doz.

Hollyhocks

Hollyhocks. One of the oldest and most popular perennials; double white, pink, red and yellow. 20c. each, \$2.00 per doz.

H. Allegheny. A new beautiful variety with single semi-double flowers on short stems. 25c. each, \$2.50 per doz.

Iris

Iris, German. All colors. 15c. each, \$1.50 per doz.

Iris, Japanese. Suited for a moist situation. Named varieties, 25c. each, \$2.50 per doz. Mixed varieties, 15c. each, \$1.50 per doz.

Lychnis

Lychnis chalcidonica. Grand bedding plants with vermilion scarlet flowers, as showy as many geraniums. Excellent for cut flowers. 10c. each.

Paeonia

Paeonia officinalis. Especially valuable on account of early flowering; red, white and pink flowers. 25c. each, \$2.50 per doz.

Papaver

Papaver orientale. *Poppy.* The most gorgeous of all herbaceous plants, with beautiful red flowers. 15c. each, \$1.50 per doz.

Pentstemon

Pentstemon, Beard Tongue. Effective plants for hardy borders or rockeries. Well established clumps increase in beauty each year and add beauty to any garden. 15c. each, \$1.50 per doz.

P. ovatus. One of the most showy hardy plants when in full bloom. Flower stems two feet or more in height, carrying a mass of its novel flowers. On first opening, its flowers are blue, afterward changing to purple; two lipped with the lower lip bearded. Foliage bright shiny green. 15c. each, \$1.50 per doz.

Phlox

Phlox. A most useful perennial in many beautiful colors, white, red, pink, purple. 15c. each, \$1.50 per doz.

Pinks

Pinks, Hardy. An old-time favorite in best varieties. 15c. each, \$1.50 per doz.

Phlox

Platycodon

Platycodon grandiflorum. *Chinese Bell Flower.* Blooms constantly from July until late in September; flowers large, bell-shaped, of a deep shade of blue. An extremely rapid-growing plant, will do well in any ordinary garden soil. Perfectly hardy, making a dense branching bush two to three feet high. 10c. each, 3 for 25c.

Primula

Primula veris. *English Cowslip.* 10c. each, \$1.00 per doz.

P. vulgaris. *English Primrose.* An old favorite, with bright yellow flowers. 15c. each, \$1.25 per doz.

Pyrethrum

Pyrethrum hybridum. A hardy perennial; flowers are somewhat like an aster and range in color from pure white to deep purple; blooms in June. 30c. each, \$3.00 per doz.

Rudbeckia

Rudbeckia, Golden Glow. A beautiful double yellow flower; blooms from early Summer until late Fall. 15c. each, \$1.25 per doz.

Spiraea

Spiraea. Herbaceous varieties. 20c. each, \$2.00 per doz.

Stokesia

Stokesia cyanea. *Cornflower Aster.* A grand large-flowered hardy perennial that is certain to become a favorite. Grows 18 to 24 inches high and is covered with Centaurea-like flowers of a beautiful lavender-blue shade, and often four to five inches across. Blooms appear in July and continue freely until late in October. Of easiest possible culture, flourishing wherever given an open sunny exposure. 15c. each, \$1.50 per doz.

SELECT LIST OF HARDY ROSES

The Rose is one of my leading specialties, and my facilities for handling them are about perfect. The plants I offer are grown in England or Ireland; are strong field-grown plants, shipped to me in the Fall, and on arrival are placed in pots in cold greenhouse, where they are well cared for, and by Spring are well rooted, well developed sturdy plants, ready to break into bloom almost as soon as planted out. These plants should not be compared with the cheap Holland-grown stock, which usually dies the first Summer. The following list of varieties embraces only the hardier and more desirable sorts, that may be depended upon for thoroughly satisfactory results.

Ever-Blooming Roses

Bon Silene. Noted for the great size and beauty of its buds; bright rich rose-crimson; good for house or outdoor culture.

Clothilde Soupert. French; white deepening to rose at center; a very free flowerer.

Duke of Albany. Vivid crimson when first opening, becoming darker as the flowers expand, and developing a beautiful shading of velvety black; very large and full.

Earl of Dufferin. Rich velvety crimson, shaded with dark maroon; large, full, finely formed, delightfully fragrant; one of the finest dark roses; a vigorous grower.

Gruss an Teplitz. Sometimes called Crimson Hermosa. One of the most valuable hardy crimson everblooming roses for garden planting ever introduced. The color is dark rich crimson, passing to velvety fiery red; one of the very brightest colored roses we know. Flowers large, full and sweet; very showy and handsome, blooms constantly, throwing up fresh buds and flowers the whole growing season. It is a healthy, vigorous grower, entirely hardy here with usual Winter protection.

Hermosa. One of the most desirable pink sorts for bedding.

John Hopper. A standard sort; bright rose with carmine center, large and full; a profuse bloomer.

Kaiserin Augusta Victoria. Creamy white, sweetly fragrant; very full and large flowers and large pointed buds. Very hardy and continuous bloomer.

Killarney. Probably no rose has ever taken such a prominent place so quickly as Killarney. It is already one of the most popular of our garden Roses, and also one of the leading varieties for Winter cut flowers. It is perfectly hardy in this latitude: in growth it is strong and robust, and as free-flowering as any Rose we know. In

color it is a sparkling, brilliant imperial pink; the blooms are large, the buds long and pointed, the petals very large and of great substance, and just as handsome in the full-blown flower as in the bud form.

Killarney Rose

EVERBLOOMING ROSES—Continued.

Maman Cochet. Bears a profusion of deep rose-pink flowers, very double, on long, stiff stems.

Marie Van Houtte. A lovely variety; soft, creamy white, shaded with rose and pale yellow; exquisitely scented.

Queen's Scarlet. Rich velvety scarlet; constant and profuse bloomer; very hardy.

Safrano. Saffron yellow; well adapted for outside use; very fragrant; quick, constant bloomer.

Souvenir de la Malmaison. Rich flesh color, beautifully formed—a perfect rose.

Souvenir du President Carnot. A rose that pleases everybody; fine in form, of large size and delicate in color; a soft rose shading to white, buds long and borne on good stiff stems. First-class in every way.

Price, any of the above, strong 2 years old, 40c. each, \$4.00 per doz.

Best Hardy Garden Roses

Anna de Diesbach. Clear bright carmine; very large, finely shaped, full and very sweetly scented.

Baby Rambler, Crimson. A compact bush about two feet high, with broad clusters of crimson flowers like those of the Crimson Rambler. One of the finest bedding roses ever introduced.

Baby Rambler, Pink. All of the characteristics of the Crimson but loaded down with great clusters of bright pink roses.

Baby Rambler, White. Same, with white flowers.

Baron de Bonstettin. Dark red, nearly black, very large flower and strong grower.

Baroness Rothschild. Light pink, cupped form, very symmetrical, distinct and beautiful; an excellent exhibition variety.

Rose Prince Camille de Rohan

Frau Karl Druschki

Coquette des Alpes. White, center shaded rose; very hardy with large bold flowers.

Etoile de France. A new French variety, of strong vigorous growth, with good dark foliage and flowers which are full and double, and as beautiful in the bud as in the full-blown flower. These are borne on strong shoots in the greatest profusion. In color it is a rich velvety crimson, with vivid cerise-red center. Strong two-year-old plants, 50c. each, \$5.00 per doz.

Frau Karl Druschki. This is the ideal hardy white Rose, pure in color, perfect in form; strong grower and remarkably free-flowering; superb in every way.

General Jacqueminot. Scarlet-crimson, very rich and velvety; exceedingly handsome.

Jules Margottin. Bright carmine; cup-shaped flowers; very fragrant.

La France. Delicate silvery rose changing to silvery pink; very full, of fine form, a most constant bloomer. The sweetest of all roses, surpassed by none in delicacy of its coloring.

Margaret Dickson. White, with pale flesh center; large shell-like petals, good form and handsome foliage.

Paul Neyron. Dark rose of fine shape and habit; large rose-colored sort.

Prince Camille de Rohan. Deep velvety crimson-maroon, shaded scarlet.

Ulrich Brunner. Bright cerise rose; magnificent petals, large and full flowers.

Price of above, except where noted, two years old, 40c. each, \$4.00 per doz.

Hardy Climbing Roses

Baltimore Belle. Pale blush, becoming nearly white; compact and fine.

Crimson Rambler. The fastest growing and hardiest climbing variety offered. Flowers are of the brightest crimson, borne in clusters, and retain their color untarnished for two or three weeks. Although used mostly for outdoor work, is adapted for pot culture.

Cumberland Belle. A new climbing Moss Rose. In color it presents a bright silvery-rose of a most attractive hue. The buds are prettily mossed and exquisitely fragrant.

Dorothy Perkins. Not since the advent of the Crimson Rambler has a rose of that character attracted so much attention and admiration as this remarkably strong, vigorous, free-flowering, fragrant Rambling Rose. The individual flowers are larger than Crimson Rambler, borne in clusters of twenty to thirty, are very double and deliciously sweet-scented, a characteristic not possessed by other roses of this class. The buds are remarkably pretty, being quite pointed, rendering them exquisite for the button-hole. The color is a most beautiful clear shell-pink, and holds a long time without fading. In vigor of growth it cannot be equaled, making in a single season strong shoots often ten to twelve feet in height, rendering it a fitting companion to the Crimson Rambler. Two years old, 35c. each; extra heavy, 50c. each.

Lady Gay. Claimed to be far superior to Crimson Rambler, of which it is a seedling, and which it closely resembles in habit of bloom and vigor of growth. The flowers (in large loose clusters) are of a delicate cherry-pink color, fading to a soft tinted white. The effect of a plant in full bloom with the combination of soft white flowers, cherry-pink buds and deep green of the foliage is

Crimson Rambler Rose

Dorothy Perkins Rose

indeed charming. It is perfectly hardy and unsurpassed for climbing work.

Philadelphia. An improvement on Crimson Rambler, with larger trusses of flowers which are perfectly double and more deeply colored. The color does not fade out, and the foliage is handsome at all times. Splendid for covering pergolas and porches.

Queen of the Prairies. Bright rosy-red, frequently with white stripe. Foliage large and quite deeply serrated.

Setigera. The Michigan, or Prairie Rose. Now that single roses are so popular, this variety will be much sought after. It is a climber, and when trained over a veranda makes a beautiful display. Large, single flowers, of a deep rose color.

Seven Sisters. Crimson, changing all shades to white. One of the old-fashioned favorites.

Yellow Rambler. A good hardy sort; strong, vigorous climber; blooms borne in immense clusters of dark, rich, coppery-yellow, sometimes inclined to be creamy, and of great fragrance.

Price, any of above, except where noted, strong two years old, 40c. each; extra heavy, 50c. each.

FRUIT TREES

Apples

Arkansas Black. Tree very hardy, coming into fruiting young; fruit large, round and smooth; skin black, flesh yellow, juicy, crisp and delicious flavor; one of the best eating apples, ripening December to April.

Baldwin. Large, roundish; deep bright red; juicy, crisp, sub-acid, good flavor; very productive of fair, handsome fruit. One of the most popular varieties in northern States. January to April.

Ben Davis. Large, handsome, striped, productive; a late keeper. Tree remarkably healthy and vigorous. A profitable market sort. December to March.

Grimes' Golden. *Grimes' Golden Pippin.* Of the highest quality; medium to large size; deep golden yellow, sub-acid, aromatic, spicy and rich. Tree vigorous and productive. January to April.

Maiden's Blush. Rather large, smooth, regular, with a fine, evenly shaded red cheek or blush on a clear, pale yellow ground; flesh white, tender, sprightly, with a pleasant sub-acid flavor. September and October.

Mammoth Black Twig. A very large, dark red Winter apple from Arkansas. Is being largely planted for a market variety in the West as superior to Winesap. Tree vigorous, hardy and productive. November to April.

Northern Spy. Large, roundish, slightly conical, somewhat ribbed. Flesh white and tender, with a mild sub-acid, rich and delicious flavor. The tree should be kept open by pruning, so as to admit the air and light freely. January to June.

Orange Pippin. Medium size; golden yellow; very productive and valuable. Early.

Paragon. Fruit large, roundish, somewhat flattened; color dark red, slightly streaked; flesh firm, yellow, crisp, aromatic, sub-acid and juicy. It is a very late keeper, rich and of excellent quality. Its full size, showy appearance, long keeping and splendid shipping qualities, together with its excellent flavor, render it very valuable as a market or family variety. November to April.

Wealthy

Red Astrachan. Large, roundish, nearly covered with deep crimson, overspread with a thick bloom; juicy, rich, acid, beautiful, productive. August.

Rhode Island Greening. Large, greenish-yellow; tender, juicy and rich, with rather an acid flavor; an abundant bearer. December to April.

Smith Cider. Medium size; greenish-white, striped with red; very productive. December to March.

Smokehouse. A popular old variety in Pennsylvania, where it originated. Above medium, roundish oblate; yellow, shaded and striped with bright red; flesh yellowish, crisp, juicy, rich, and pleasant sub-acid. A rather crooked grower, but productive. September to February.

Starr. This apple has every good point in its favor—early ripening, large size, good quality and productiveness; color of fruit pale green, frequently with blush on sunny side. As a cooking apple it cannot be equaled, having a rich, sub-acid flavor, and when thoroughly ripe is a delicious apple to eat out of hand. As a market apple it cannot be surpassed.

Sutton Beauty. One of the most desirable of recent introductions, beautiful and valuable. Has proven one of the best in western New York. Medium to large, roundish, handsome, waxen yellow, striped crimson, flesh tender, juicy, sub-acid, good quality. Keeps well. November to April.

Wealthy. As a late Fall apple the Wealthy has few equals. It may be called the fruit growers' favorite on account of its productiveness, large size, good quality and attractiveness; skin smooth, oily, mostly covered with dark red; flesh white, fine grained, juicy, vinous, sub-acid; unequaled for cooking and excellent to eat out of hand; tree a free grower, very hardy and exceedingly productive; ripens October to November.

Winesap. Medium size, dark red, rich flavor; very productive. Late.

Yellow Transparent. One of the most desirable early apples in cultivation. Early bearer, frequently producing fine fruit on 2-year trees in nursery rows. Good grower and hardy; fruit pale yellow, roundish ovate, good size and good quality; skin clear white at first, becoming a beautiful pale yellow when fully matured. July and August.

York Imperial. Esteemed for its productiveness and fine quality. Tree moderately vigorous. Fruit medium, smooth, yellow, shaded crimson with red stripes; flesh yellow, firm, juicy, mild, sub-acid, good. An excellent shipping apple and a general favorite. December to February.

Crab Apples

Hyslop. Fruit large, produced in clusters, deep crimson covered with blue bloom. Very popular on account of its large size, beauty and hardness. October to January.

Transcendent. Tree immensely productive, bearing after second year. Fruit from 1½ to 2 inches in diameter; excellent for sauce and pies, both green and dried; skin yellow, striped with red; most popular. September and October.

Prices of Apple Trees: Extra, 6 to 8 feet, by express or freight, 50c. each, \$5.00 per doz., \$35.00 per 100; 3 years, 5 to 6 feet, by express or freight, 35c. each, \$3.50 per doz. \$25.00 per 100. Special quotations on large quantities and lighter grades.

Apricots, Russian

Alexander. Ripens latter part of July; fruit medium in size, oblong and flattened, orange-yellow with faint blush; flesh firm, rather coarse.

Catherine. Earlier than Alexander; fruit small to medium, slightly oblong, globular, deep rich orange with dull red cheek; nearly dry in flesh; quality good.

J. L. Budd. About same as Catherine in season of ripening; oblong in shape; light orange with faint blush; flesh juicy with a sweet peachy flavor; quality good. Price, two years old, 40c. each, \$4.00 per doz.

Cherries

Black Eagle. Large, black; tender, rich, juicy and high flavored. Tree a *moderate* grower and productive. Ripe beginning of July.

Black Tartarian. Very large, purplish-black; half-tender; flavor mild and pleasant. Tree a remarkably *vigorous*, erect and beautiful grower, and an immense bearer. One of the most popular varieties. Last of June and beginning of July.

Early Richmond. Medium size, dark red; melting, juicy, sprightly acid flavor. This is one of the most valuable and popular of the acid cherries, is unsurpassed for cooking purposes and exceedingly productive. June.

Governor Wood. Fruit large, roundish, heart-shaped. Skin light yellow, shaded and marbled with bright red. Flesh tender, juicy, sweet, rich and delicious. Tree vigorous and very productive. Middle of June.

Large Montmorency. A popular market variety; good for all purposes. Vigorous grower, very productive. Fruit large, light red; ten days later than Early Richmond. Last of June.

Mercer. A heart variety of large size, excellent quality and attractive appearance, larger than Black Tartarian; color when ripe very dark red, very meaty and firm, free from rot and disease, very productive, hardy and a good grower; an excellent cherry for the home garden. Early.

Black Tartarian Cherry

Green Mountain Grape—See page 30

Napoleon. A magnificent cherry of the largest size; pale yellow, with a bright red cheek; flesh very firm, juicy and sweet. Tree a *vigorous*, erect grower and bears enormous crops; ripens late; valuable for canning.

Windsor. A remarkably firm, large late variety; and no doubt the best of its season; fruit large, liver-colored, of good quality; valuable for market and family use. July.

Yellow Spanish. Large; pale yellow, with bright red cheek in the sun; flesh firm, juicy and delicious; one of the best, most beautiful and popular of all light-colored cherries. Tree erect, *vigorous* and productive. End of June.

Prices of Cherry Trees: Extra heavy, 5 to 7 feet, 60c. each, \$6.00 per doz., \$50.00 per 100. First-class, 5 to 6 feet, 40c. each, \$4.00 per doz., \$30.00 per 100.

Grapes

At the single and dozen rates, delivered postpaid; at the 100 rate, by express at purchaser's expense.

Brighton. Bunch large, well formed; berries above medium to large, round; excellent flavor and quality. One of the earliest in ripening.

Campbell's Early. A valuable and delicious grape; vine very strong, hardy and vigorous, with thick, healthy foliage; an abundant bearer; berries large, black, with light purplish bloom; skin thin; flesh firm but tender; few and small seeds; flavor rich, sweet and delicious.

Colerain. Early. A new variety. Regarded as one of the best native white grapes in cultivation. Color a light green, with delicate whitish bloom; size medium; ripens early and hangs well on the bunch; skin thin and tender; flesh juicy and remarkably sweet.

Columbian. Is claimed to be the largest grape ever placed on the market, and forms large, compact clusters. It is an excellent table grape, and excels all others for jelly. Vine is a strong grower, free from mildew, enormously productive of handsome clusters of immense grapes, black in color, ripening midseason.

Niagara Grape

Concord. The well-known standard variety, succeeds wherever grapes will grow.

Delaware. Bunches small, compact, shouldered; berries rather small, round; skin thin; light red; flesh very juicy, sweet, spicy and delicious.

Eaton. A healthy, vigorous vine, free from mildew. Bunch very large, compact, often double shouldered; berries very large, many an inch in diameter, round, black, covered with a heavy blue bloom; adheres firmly to the stem; skin thin but tough, with no bad taste; pulp large and tender, separating freely from the seeds.

Green Mountain. A very early grape of the best quality; entirely free from foxiness. The berries are of medium size; the color greenish-white; skin thin and fine quality, almost melting in the mouth; vine vigorous, healthy and productive. One-year-old, 25c. each, \$2.50 per doz.; two-year-old, 30c. each, \$3.00 per doz.

Lady. Seedling of the Concord, possessing all the vigor of the parent vine; berries large, light greenish-yellow; skin thin; pulp tender, sweet and rich. Ripens early.

Lutie. Dark red; bunch and berry medium to large; skin tough and thick; flesh pulpy, sweet and quite foxy; quality only fair; vine hardy, vigorous and productive. It sells well as an early red grape, ripening about with Moore's Early.

Moore's Diamond. A strong healthy grower, hardy and productive; color white; bunch and berries large, compact, shouldered; skin thick, firm; flesh tender, juicy, but with little pulp; ripens before Concord.

Moore's Early. Bunch large; berry large, round, with heavy blue bloom. Vine exceedingly hardy. Its earliness makes it desirable for an early market.

Niagara. Vine hardy, an unusually strong grower; bunches very large and compact, sometimes shouldered, berries large, mostly round, light greenish-white, semi-transparent, slightly ambered in the sun; skin thin, but tough, and does not crack; has very little pulp, is melting and sweet to the center.

Pocklington. Bunch and berries large, when fully ripe a light golden-yellow; juicy, tender, sweet, with little pulp. Vine thoroughly hardy, strong grower; productive.

Salem (Roger's No. 53). A strong, vigorous vine; berries large, Catawba color; skin thin, free from hard pulp, very sweet and sprightly.

Vergennes. Berries large, holding firmly to the stem; light amber; rich and delicious.

Woodruff. Of ironclad hardness. A rank grower and very healthy. The fruit is large in bunch and berry, attractive, shouldered, sweet and of fair quality. Ripens soon after Concord.

Worden. A beautiful, large black grape; larger, earlier and decidedly better than Concord.

Wyoming. Vine very hardy, healthy and robust. One of the most beautiful of the amber or red grapes, and in size nearly double that of the Delaware. Flesh tender, juicy, sweet, with a strong native aroma. Ripens before Delaware.

Prices, except where noted: 1-year-old, 10c. each, \$1.00 per doz.; 2-year-old, 25c. each, \$2.50 per doz. Extra strong, 3 and 4-year bearing vines, 50c. each, \$5.00 per doz.

Peaches

Beer's Smock. Large size; flesh yellow; an improvement on Smock Free; a few days later and an annual bearer. September and October.

Carman. Fruit large, with pale yellow skin, red blush on sunny side; flesh white, tender and melting, rich sweet and of superior flavor. As a very early peach it has no equal.

Crawford's Early. The best yellow peach for market; fruit large, oblong; skin yellow, with fine red cheek; flesh yellow, juicy; wonderfully productive. Last of August.

Crawford's Late Peach—See page 31

Crawford's Late. Fruit of the largest size; skin greenish-yellow, with dull red cheek; flesh yellow; one of the finest late sorts. Last of September.

Elberta. Large, yellow, with red cheek; flesh yellow; firm, juicy, of high quality. Exceedingly prolific, sure bearer and hardy. Is doing well in all peach sections north and south. One of the leading market varieties. Follows Early Crawford.

Ford's Late White. Large, white, handsome; of good quality. October.

Frances. This new peach is destined to become as popular as Elberta, which it follows closely after ripening. It is one of the handsomest peaches ever grown, being of a beautiful shade of yellow, covered almost entirely with brilliant red. In size it is about the equal of Elberta. It is very productive. It is a true freestone, with particularly solid flesh, and as a shipper is absolutely without a rival.

Globe. An improved Crawford Late. Fruit large, globular; flesh firm, juicy, yellow, shaded with a reddish tinge toward the pit; quality good, pleasant, rich, vinous and luscious. Last of September.

Large Early York. Medium, light red; juicy and rich. Freestone.

Mountain Rose. The largest early peach. White, with red cheek; rich and very good; productive and reliable. Freestone.

Oldmixon Free. Uniformly large; white, covered with bright red; one of the best. Last of August.

Sneed. Very early; fully as large as Alexander; red cheek; flesh white, very sweet and juicy; good flavor. A good shipper. July.

Stump the World. Very large; skin white, with bright red cheek; flesh white, juicy and good. Last of September.

Waddell. In size it is medium, oblong in shape; creamy-white, with bright blush; flesh white, firm, very sweet and rich; freestone.

Prices of Peach Trees: Extra, 5 to 6 feet, 25c. each, \$2.50 per doz., \$12.00 per 100. First-class, 4 to 5 feet, 20c. each, \$2.00 per doz., \$10.00 per 100.

Pears

Anjou. A large and handsome pear, buttery and melting; one of the most valuable; tree a vigorous grower and productive. October.

Bartlett. Large size, with often a beautiful blush next the sun; buttery, very juicy and high flavored; bears early and abundantly; very popular. August and September.

Flemish Beauty. Large, beautiful, juicy, melting, rich and fine; good bearer; one of the hardiest and does well nearly everywhere. September and October.

Howell. Large, light, waxen yellow, with a fine, red cheek; handsome, rich, sweet, melting; perfumed, aromatic flavor. An early annual and profuse bearer; hardy and valuable. September and October.

Kieffer. While not of best quality, properly ripened it is a fair dessert fruit, and one of the very best for canning and preserving. Its large size and handsome appearance will always cause it to sell readily on the market. October and November.

Lawrence. A good grower, with good foliage; very productive and an annual bearer. Fruit medium, canary-yellow, sweet and excellent; a good keeper. December.

Le Conte. Very vigorous grower, with luxuriant foliage; fruit very large, greenish-yellow, smooth and handsome; juicy, fair quality. Early.

Rossney. A large variety of rare merit; flesh fine grained, melting, juicy and of superior flavor; skin a beautiful creamy yellow, with crimson blush, giving it a tempting appearance; ripening

as it does about two weeks after Bartlett, it is profitable as a market variety; tree a vigorous grower, equal to Kieffer, and very productive.

Seckel. Small, skin rich yellowish-brown, when fully ripe, with deep, brownish-red cheek; flesh very fine grained, sweet, exceedingly juicy, melting, buttery; one of the richest and highest flavored pears known. Tree a moderate grower. September and October.

Vermont Beauty. In quality the fruit approaches nearer that most delicious of pears, the Seckel, than any other pear on the market. The fruit is full medium size, yellow, covered on the sunny side with a bright carmine red, making it exceedingly attractive and handsome; flesh melting, rich, juicy, aromatic. Ripens with and after the Seckel, and is much larger and more attractive in appearance.

Worden-Seckel. A seedling of the Seckel, which for many years has been conceded to be the standard of excellence. Equal in quality to its famous parent, which it much resembles in flavor, is equally as luscious, more juicy, and with an aroma equally as rich and inviting, while in size, color, form and appearance it is decidedly superior. Grown under like conditions, it will average a half larger. In color, when well ripened, it closely resembles Clapp's Favorite. Tree a more upright and rapid grower than Seckel; hardy and an enormous bearer; fruit keeps well, retaining its quality to the last. October.

Prices of Pear Trees, except where noted: Extra, 5 to 7 feet, by express or freight, 50c. each, \$5.00 per doz., \$35.00 per 100. First-class, 5 to 6 feet, by express or freight, 35c. each, \$3.50 per doz., \$25.00 per 100.

Worden-Seckel Pear

Plums

Abundance. In tree and fruit unlike any other plum. In growth it is so strong and handsome as to render it worthy of being planted as an ornamental tree. The fruit is very large, showy and beautiful. Amber, turning to a rich, bright cherry color. Early August.

Burbank. Medium to rather large, roundish conical in form; orange-yellow, overlaid with red; flesh firm, meaty, yellow, rich, sugary; from two to four weeks later than Abundance.

Hale. The plums are of the largest size of its class, bright orange-yellow skin, mottled and nearly covered with vivid cherry-red; flesh yellow, firm and delicious.

Red June (Japan). Vigorous, hardy, early, productive; fruit medium to large, deep vermilion-red; very showy; flesh light lemon-yellow, firm and of excellent quality.

Sultan. One of the most attractive of plums; very large in size, deep purplish-crimson in color; flesh very firm, fragrant, sweet, dark crimson shaded with pink. Tree a strong, vigorous grower and very productive.

Wickson. Fruit large, obconical, dark crimson-purple; flesh very firm, yellow, juicy, sub-acid, highly flavored; pit small; clingstone; quality best. An excellent keeper. Ripens after Burbank.

Wild Goose. Large, rich, crimson; very productive and profitable.

Prices of Plum Trees: Extra, 5 to 6 feet, 40c. each, \$4.00 per doz., \$30.00 per 100. First-class, 4 to 5 feet, 35c. each, \$3.50 per doz., \$20.00 per 100.

Quinces

Bourgeat. A new golden prolific variety of the best quality, ripening shortly after Orange and keeping until Midwinter. Tree a remarkable, strong grower, yielding immense crops. Fruit of largest size, round, rich golden color; smooth, very tender when cooked. Price, 2 years old, 50c. each, \$4.00 per doz.

Champion. A prolific and constant bearer, fruit averaging larger than the Orange; bears extremely young, producing fine fruit on two-year trees in the nursery row. Price, two years old, 50c. each, \$4.00 per doz.

Meech. A vigorous grower; immensely productive, frequently bearing fruit when but two years of age; the fruit is large, lively orange-yellow, of great beauty and delightful fragrance; its cooking qualities are unsurpassed. Price, two years old, 50c. each, \$4.00 per doz.

Orange. Large, roundish; bright golden yellow; cooks tender and is of very excellent flavor; valuable for preserves or flavoring. Price, two years old, 50c. each, \$4.00 per doz.

ASPARAGUS

Barr's Philadelphia Mammoth. A more productive variety than Conover's, and the stalks are oftentimes twice as large and usually sells at higher prices. 2-year-old, 75c. per 100, \$4.00 per 1000.

Columbian Mammoth White. A variety in great demand by those who grow asparagus for canneries, as it makes a very strong, vigorous growth, producing very large white shoots in abundance. A profitable variety. 2-year-old, \$1.00 per 100, \$6.00 per 1000.

Conover's Colossal. A well-known and standard variety of vigorous growth, sending up sprouts from one to two inches in diameter. Color deep green. 2-year-old, 75c. per 100, \$4.00 per 1000.

Donald's Elmira. New; large, tender. Very much desired for garden or market purposes. 75c. per 100, \$5.00 per 1000.

Giant Argenteuil. This variety is largely grown in France, but has become adapted to our soil and climate. Is noted for its earliness, productiveness, and immense size of stalks. Remarkably healthy. 2-year-old, \$1.00 per 100, \$6.00 per 1000.

Palmetto. A very early variety and extensively grown for New York and Philadelphia markets, where it commands high prices on account of its earliness, even, regular size and excellent quality. 2-year-old, 75c. per 100, \$4.00 per 1000.

RHUBARB. Pie Plant

Linnaeus. An old and valuable variety. Stalks large, tender and fine.

Victoria. A strong grower, producing large

stalks of fine quality. An excellent cooking variety.

Price, either variety, strong roots, 10c. each, 75c. per doz., \$5.00 per 100.

HORSE-RADISH

Horse-Radish Sets. 15c. per doz., 75c. per 100, \$4.00 per 1000.

SMALL FRUITS

Blackberries

Eldorado. A very vigorous grower, free from mildew, rust or double blossom, enormously productive, even harder than Snyder; fruit large to very large, excellent quality, free from core. 50c. per doz., \$2.00 per 100, \$15.00 per 1000.

Erie. As hardy as Snyder, as vigorous as Kittatinny; very productive; free from rust or double blossom; fruit of good quality, round, as large as Lawton. 75c. per doz., \$3.00 per 100, \$12.00 per 1000.

Ohmer. Canes hardy, healthful; fruit very large; of excellent quality, firm, with no core, and sweet before soft or fully ripe. 50c. per doz., \$2.00 per 100, \$15.00 per 1000.

Mersereau. Remarkably strong grower, upright, producing stout stocky canes. Claimed to be the hardiest blackberry, standing uninjured 20 degrees below zero without protection. An enormous producer of extra size berries which are brilliant black and retain their color, under all conditions; extra quality; sweet, rich and melting, without core. Unsurpassed as a shipper and keeper. Ripens with Snyder. 75c. per doz., \$3.00 per 100.

Rathbun.

Fruit is of enormous size, single specimens measure one and three-quarters inches in length, and the whole crop is very uniform. Fruit is quite firm, sweet, luscious, with no core, and ships well. Plant is very hardy. 50c. per doz., \$2.00 per 100, \$15.00 per 1000.

Ward. A new blackberry of great merit. A seedling of the Kittatinny, which it resembles somewhat, having the good qualities of its parent and none of the defects. A very strong grower; it is perfectly hardy at its home in New Jersey. The fruit is black throughout and very prolific, firm and good for shipment, yet tender and melting, and of highest quality. A very promising new variety. 50c. per doz., \$2.00 per 100, \$15.00 per 1000.

Cherry Currants

Rathbun Blackberries

Currants

Black Naples. Bush very vigorous, upright, moderately productive; fruit varies from small to large, averaging above medium; pulp acid, with strong flavor. An old and well-known variety.

Cherry. Bush vigorous, stocky and compact; cluster rather short, with short stems; fruit averages large; color fine, bright red; berry thin skinned, juicy and fine flavored. One of the most productive of the large currants.

Fay. *Fay's Prolific.* Bush vigorous, but not quite so strong a grower as Cherry; cluster medium to long, with rather long stems; color darker than Cherry; berry averages large; juicy and less acid than Cherry.

North Star. Bush very vigorous, upright, somewhat spreading; clusters medium length; berries vary from small to medium or above; dark red; comparatively mild acid. Hardy and productive.

Red Dutch. An old and well-known standard variety. Bush a strong, tall, upright grower; clusters average about three inches long; berries medium in size, dark red; sprightly sub-acid flavor. Productive.

Versailles. *La Versailles.* Bush a vigorous, somewhat spreading grower. Very similar to Cherry in habit of growth and character of fruit.

White Grape. Bush vigorous, somewhat spreading, productive; clusters long; berries large to very large, averaging large; of very attractive color, mild flavor and good quality. A good table variety.

Price, any of above varieties of currants, except where noted, strong 2-year-old, 10c. each, \$1.00 per doz., \$7.00 per 100.

Cumberland Raspberries

Gooseberries

Chautauqua. A new white gooseberry, equaling the finest and largest varieties in size, beauty and quality, and excelling them all in vigor and yield. 25c. each, \$2.00 per doz., \$15.00 per 100.

Columbus. A new yellow variety; very prolific, free from mildew; fruit larger than Industry. 2-year, 20c. each, \$2.00 per doz., \$15.00 per 100.

Downing. Bush vigorous and very productive. Fruit medium to large, skin whitish green; flesh soft, juicy. Excellent for family use and very profitable for market. 15c. each, \$1.50 per doz., \$10.00 per 100.

Houghton. Bush a vigorous grower, with rather slender branches; very productive. Fruit medium size, pale red, tender and good. 15c. each, \$1.50 per doz., \$10.00 per 100.

Pearl. A very productive and perfectly healthy variety, quite free from mildew. A robust, vigorous grower, with berries larger than Downing, and of excellent quality. 2-year, 15c. each, \$1.50 per doz., \$10.00 per 100.

Red Jacket. Of American origin, possessing all the good qualities of the English type, and withstanding our severe climatic conditions with impunity. A wonderful cropper, with clean healthy foliage. 15c. each, \$1.50 per doz., \$10.00 per 100.

Triumph. An American seedling of the English type. Fruit large, golden yellow; bush hardy, an immense bearer. Very promising. 2-year, 25c. each, \$2.00 per doz., \$15.00 per 100.

Gooseberries

Raspberries

Brilliant. A variety surpassing in productiveness, size, color and hardiness the famous Miller. Ripens its fruit earlier and faster, producing bright, glossy, brilliant red berries, handsome. Being a remarkably good shipper, reaching market in all its brilliancy and firmness, it finds ready sale at good prices. \$1.00 per doz., \$4.00 per 100.

Cumberland. Blackcap. The largest raspberry known. Selected specimens measure an inch in diameter, while they are uniformly very large. The canes are extremely hardy, having undergone a temperature of sixteen degrees below zero unprotected without injury. They are immensely productive, producing annually very heavy crops. Fruit firm, and in quality equal to the very best blackcaps. Season a little in advance of Gregg. 50c. per doz., \$3.00 per 100.

Cuthbert. A remarkably strong, hardy variety; stands the northern Winters and southern Summers equal to any. Berries very large, measuring three inches around; conical; rich crimson; very handsome, and so firm they can be shipped hundreds of miles by rail in good condition; flavor is sweet, rich and luscious. 50c. per doz., \$1.50 per 100, \$10.00 per 1000.

Columbian. A most vigorous grower. Canes ten to fifteen feet long. It is very hardy, enduring twenty-eight degrees below zero without injury. Fruit very large, often an inch in diameter; color dark red, bordering on purple; adheres firmly to the stem, and will dry on the bush if not picked; of rich, sprightly flavor; the best for canning or evaporating. 75c. per doz., \$3.00 per 100, \$20.00 per 1000.

Gregg (Black). Has been for many years the leading market berry. Large, firm, of good quality, ripening late. Exceedingly productive. 50c. per doz., \$1.50 per 100, \$12.00 per 1000.

Golden Queen. The most desirable yellow raspberry ever introduced, especially for home use. Berries are large, of beautiful bright yellow color and of excellent quality; medium to late. 75c. per doz., \$3.00 per 100.

Phoenix. Of ironclad hardiness; a vigorous, upright grower, with stout, sturdy canes; immensely productive. Fruit of large size, bright red; equal to the old Hudson River Antwerp in high quality, lusciousness and superior shipping properties. 75c. per doz., \$3.00 per 100.

Write for special quotations on large quantities.

STRAWBERRIES

I can supply Strawberry plants during August at given rates per dozen; during September at dozen and 100 rates; in the Fall after October 15, during November and in the Spring, at dozen, 100 and 1000 rates. No plants furnished at 1000 rates in the Fall until after October 15.

The prices herein named are for strong layer plants. Price list of pot-grown plants mailed on request.

Strawberry plants at the dozen rates will be mailed free; at the 100 rate add 25c. per 100 to cover postage, packing, etc.

Cardinal

Auto. A new berry of large size and fine quality; an immense cropper, having produced more than 8000 quarts per acre. The plant is of unusual vigor.

Brandywine. A very large broad heart-shaped berry, of medium red color and firm flesh, which is red to the heart. Brandywine comes at a good time, between the medium season berries and the very late ones, and thrives on a great variety of soils. These points, combined with large size, productiveness and firmness of texture, make Brandywine a very valuable strawberry.

Bubach (P.) As a mid-season berry for home use and near market this stands second on the list.

Cardinal (P.) This new strawberry, about which there has been so much said, is very remarkable in many respects.

"It is a most wonderful strawberry; you will never be able to produce its equal, there is no point in which you could hope to improve it."

"Of vigorous growth, a great plant producer, very productive, healthy foliage, large size of fruit, uniformity of shape, firmness and valuable for market."

Chesapeake. As late as Gandy but more productive, will produce a full crop on soil too light for Gandy. Equal to Gandy in size, superior in firmness, eating and shipping qualities. In flavor it ranks with Wm. Belt. Berry of uniformly large size, very attractive in appearance, and one of the most healthful and vigorous growers.

Commander. Commander has but one fault, and that is it cannot hold up the immense load of berries that it produces. It is extra large size, the most productive among 50 varieties, commands the largest price; no rust, hardy plants and plenty of them; firm, solid scarlet berry, good shipper; perfect blossom.

Commonwealth. A new variety of great merit. The originator says: "In the Commonwealth we have a berry that is large as the largest, as productive as any of the largest, as fine flavored, as solid and as dark colored as any. It is LATE. On the 17th day of July, as good berries were picked as during the season. The last berries were picked on July 22d. The plant is a good strong grower, hardy, shows no sign of rust."

Fairfield. A very early variety, with the faculty of withstanding droughts. Plant is a fair size, good foliage with long roots. The fruit is of good size and flavor, quite firm and valuable for long shipments. Easy to pick and looks well in the crate. Ripens its fruit in a very short time early in season, thus bringing the highest market price. A very valuable early sort.

Gandy. Being the latest variety to ripen it commands the highest prices. The berries are large, very firm, of uniform size, bright crimson color, good quality. As a family berry it is equally valuable.

Heritage. The disseminator, whose father before him was a commercial strawberry grower, says: "For nearly forty years I have grown them, and after having tested hundreds of varieties, and as many seedlings, feel qualified to assert positively that with me it is the most productive and most valuable variety I have ever seen. The plant is a most vigorous, rampant grower and a prodigious yielder. Berries uniformly large to very large, dark shining crimson and beautiful; conical, uniform in size and shape, of superior quality and solid texture. Begins to ripen early to mid-season, and continues until very late. A very promising variety." Price, \$1.50 per 100, \$6.00 per 1000.

Commonwealth

Kitty Rice

Kitty Rice. Berries quite large, glossy and of dark-red color. Quality extremely fine. The plants are good growers—both strong and vigorous and very prolific—being valuable both for the home garden and for commercial purposes. Season of ripening about the same as Bubach. This is one of the fancy berries that pleases the amateur grower.

New Home. As late and large as Gandy, fruit a bright red color that does not lose its lustre and turn dark after being picked a long time; uniform large size and the best shipping and keeping berry grown, the fruit is so firm and keeping quality so excellent it does not need to be picked oftener than three times a week, when it will usually make 1000 quarts or more per acre at each picking during the height of the season.

Nick Ohmer. M. Crawford's report: "After watching Nick Ohmer for years, and never having received one unfavorable report on it, I am confident that it is one of the most desirable, if not the very best strawberry ever sent out. There is no other in the market, or in sight, that I would plant with so much confidence. If restricted to a single variety, it would be my first choice, without a moment's hesitation." The fruit is of the very largest size—a giant among strawberries.

Stevens' Late Champion

President (P.) A most remarkable variety; ripening in mid-season. For large size, beauty, great productiveness and high quality, united in a single variety, it is without an equal among strawberries. It is superb. The plant is of mammoth size, and with ordinary culture the huge berries are literally heaped along the row. The quality is of the richest and highest.

Sample (P.) One of the most popular varieties ever introduced. It is one of the very best pistillate kinds in cultivation. The plant is large and healthy, and makes plenty of runners. It is a great bearer of large roundish berries, dark red to the center, moderately firm, and of good quality. The fruit is large to the close of the season. Late.

Saunders. It has a strong, perfect blossom, and is one of the best to plant with pistillate varieties, as it blooms for a longer season than most kinds. The fruit is large. It is a deep red, and remarkably glossy.

William Belt

Senator Dunlap (P.) This is the most popular variety in the country at the present time. It succeeds everywhere, and is especially good for beginners, as they cannot fail with it on any soil or by any mode of culture. The plant is perfectly healthy and very prolific. The fruit is large, but not the largest and conical in form. Color a deep rich red, extending to the center. Flesh firm and of a sprightly delicious flavor. It is classed as medium, but makes a long season.

Sharpless. A grand variety in every respect; berries uniformly very large; deep clear red; moderately firm, sweet and excellent; a strong grower and very productive.

Stevens' Late Champion. "Very large, fine flavored, bright color, good shipper, heavy yielder, good fruit stem. It has been tested on all kinds of soils and will grow successfully where any strawberry will grow. It ripens later than the Gandy."

Virginia (P.) A very early variety, ripening with Michell's Early. Very productive of uniformly large size berries of a bright red color, having the appearance of being varnished, and is very attractive, both on the vines, and after being picked.

William Belt. The superb quality, the equal of which has not yet been attained in any other late variety, makes it very popular for the home garden and local market. I know of but one other variety that will approach it in quality of its season.

Price, except where noted, 25c. per doz., 75c. per 100, \$3.50 per 1000.

NUT TREES

For prices see page 38

Chestnuts

Alpha. *Japanese Grafted.* The earliest known chestnut. Comes to bearing at two to three years old and is very productive. Nuts large, four inches around and two to three to a burr. Ripens September 5th to 10th, without frost; the earliest of all, and, therefore, always sells at unusually good prices.

Hannum. *Grafted.* Tree a very vigorous, upright grower, attaining great size, the original tree having a spread of about eighty feet; immensely pro-

ductive. Nuts of medium size, light in color, bright, handsome, of very good quality.

Numbo. *Grafted.* Very hardy; very productive. Comes to bearing quite young. Nuts large and of good quality, ripening early, usually before frost, and selling at high prices.

Paragon. *Grafted.* Tree hardy, productive; nuts large and of excellent quality. Two trees four years grafted produced one bushel of nuts each, which sold at wholesale at \$10.00 per bushel.

Parry's Giant. *Japanese Grafted.* These nuts are enormous, measuring six inches in circumference and run two to a burr. Tree is a vigorous,

upright grower and very productive; nuts smooth, dark and attractive; ripens September 25th. The largest known chestnut.

Ridgeley. *Grafted.* A large variety of the chestnut from Delaware. Very productive. As indicating its great value as a market variety, the crop from the original tree is reported to have brought \$32.00. Very good quality.

NATIVE SWEET. American

The well-known chestnut of the forest, for sweetness and quality unsurpassed. A vigorous, healthy-growing tree, and the best stock on which to graft the improved varieties. It makes a beautiful shade tree, also, showing billowy masses of creamy bloom in Summer. In its season no other nut is more sought after, as evidenced by the enormous quantities sold in both the wholesale and retail markets.

Paragon Chestnuts

Other Favorite Nuts

There is no reason why these delicious nuts, so largely used for dessert purposes, should not be grown in our country instead of being imported. Trees of the most popular varieties here offered have thriven and produced well in a number of different sections of our country.

Walnuts

Persian Kaghazi is claimed to be the hardest of all soft-shelled walnuts, and stands several degrees below zero without injury. It is a vigorous, free grower; very prolific, producing nuts in clusters, and comes to fruiting very young. The nut is larger than in the ordinary varieties; the kernel full, plump, meaty, sweeter, richer in oils and of finer flavor. The shell is thin but not tender, like some "paper shell" varieties, does not crack in handling, still may be crushed in the fingers. Very desirable and valuable.

Persian (Madeira). The well-known English Walnut, a handsome, lofty-growing tree of spreading habit, hardy and productive as far north as New York City. Trees of this variety are plentiful in New Jersey, and produce annually immense crops of thin-shell nuts of a delicious quality. This tree should not be planted for the nuts alone, but as a shade and ornamental tree, its handsome form,

deep green foliage, and clean appearance rendering it strikingly handsome as a lawn tree.

Black Walnut. A native tree of large size and majestic form, beautiful foliage. The most valuable of all trees for its timber, which enters largely into the manufacture of fine furniture and cabinetware, and brings the highest price in market. Tree a rapid grower, producing a large, round nut of excellent quality.

Persian Walnut

Almond

Hard Shell. A fine, hardy variety. The nuts have large, plump kernels, and the tree large, showy, ornamental blossoms.

Butternut

Tree of rapid growth, with large, luxuriant, tropical-looking foliage; very ornamental, very productive; bears young. The nuts differ from American black walnuts in being longer, with kernels of sweeter and more delicate flavor.

Filbert. Hazelnuts

These are of the easiest culture, and among the most profitable and satisfactory nuts to grow. The bushes are of dwarf habit, entirely hardy, abundant yielders; succeed almost everywhere, and come into bearing young.

Paper Shell Pecans

The impression that the pecan can be grown only in certain favorable, moist locations, is rapidly being dismissed, as the trees are being continually discovered throughout the Middle and Western States in locations which have not been considered favorable to their growth. Here, in Burlington County, New Jersey, are a number of large, handsome trees, two to three feet in diameter, on high, dry ground, and producing annually five to six bushels of delicious thin-shelled nuts. The tree is hardy, tough, free from blight, insect scales, or any of the usual ailments common to orchard trees.

Hickory Shellbark

Hickory Shellbark. To our taste, no other nut that grows, either foreign or native, is superior to this; in quality it possesses a peculiar rich, nutty flavor, excelled by none. The tree is of a sturdy, lofty growth. The wood, on account of its great strength and elasticity, is highly prized for making agricultural implements, and is unsurpassed for fuel.

Prices of Nut Trees

		CHESTNUTS		Each	Per doz.
Japanese Alpha.	4 to 6 ft.		\$1.50	\$15.00
Parry's Giant.	4 to 6 ft.		1.50	15.00

Hardy Nymphaeas

Alba. Well-known white European Water Lily. Strong flowering roots. 50c. each, \$5.00 per doz.

Alba candidissima. A very vigorous and desirable variety, much stronger than the type, requiring ample space; flowers large, pure white, sepals occasionally flushed with pink. An early and continuous bloomer. 50c. each, \$5.00 per doz.

Odorata. This is the fragrant Pond Lily of the northeastern United States; flowers white, 3 to 5 inches in diameter, stamens yellow, leaves

dark green above, under surface deep red to reddish green; splendidly adapted for planting in quantity in natural ponds for effect and for cut flowers. 20c. each, \$2.00 per doz.

Odorata caroliniana. A superb variety and highly recommended; stronger grower and larger than the type; leaves 12 inches across, green above, reddish green in young state, red beneath, flowers fragrant, 7 inches across; of a delicate rosy flesh color, stamens yellow. \$1.00 each.

Nelumbiums (Lotus)

Luteum. *American Lotus, Water Chinquapin.* A superb variety with yellow flowers; indigenous in the Western and Southern States. It has been introduced into the Eastern States, where, as a rule, it grows as freely as any native plant. Dormant tubers, \$1.00 each.

Speciosum. *Egyptian Lotus.* The well-known species. Its superb flowers and magnificent foliage produce a splendid sub-tropical effect. The flowers, which are about a foot across when fully opened, are of a deep rose color, creamy-white at base of petals; exquisitely fragrant. Dormant tubers, \$1.50 each.

Steele's Perfect Lawn Grass Mixture

Upon no one thing does so much depend in making beautiful home grounds, as upon a good lawn, for without that velvety green carpet, no place however lavishly planned or grandly built looks finished.

The real lover of nature and the beautiful need never be disappointed if care is used in the selection of his grass seed.

To obtain a good Lawn Grass Mixture it is necessary that the best possible seed of fine grasses be used in the combination, embracing such varieties as are of neat, close growth, extreme hardiness and adapted to produce a quick, permanent sod. Judicious selection of seed, knowledge of the habits, vigor, quality and hardiness of varieties used in the mixture can only be gained by thorough and practical tests under different climatic and soil conditions. After more than twenty years' experience in lawn making with the use of various kinds of seed, much of which could not be depended upon to produce the desired effect, I determined to prepare, and offer for sale a mixture that could be relied upon, and procured only the choicest re-cleaned seed, as free from chaff and weed seeds as improved machinery could make it, and was rewarded in obtaining a mixture superior to any I had ever used, and succeeding on a great variety of soils; and I attribute this to the fact that only the choicer and heavier grades of grass seed were used in the mixture. I therefore offer with the greatest confidence, a Grass Seed Mixture composed of a thoroughly balanced combination of various native and foreign fine-leaved, deep-rooting grasses of interweaving habit, that will flourish under varied soil and climatic conditions, and as nearly perfect as a Lawn Grass Mixture can be made, and which may be depended upon to produce a beautiful, compact, evergreen sod that will resist tramping and hard usage, and at the same time present that handsome velvety appearance. A mixture equal in every respect to any on the market, and may well be termed a **Perfect Lawn Grass Mixture**. Nothing better can be had at any price. From lovers of a beautiful lawn I solicit a trial order, feeling sure they will be pleased with the result.

PRICE

Quart 25c.; Two Quarts 45c.; Five Quarts for \$1.00 postpaid; Peck \$1.25; Bushel (20 lbs.) \$4.00 by express or freight, not paid.

The Auto-Spray

A Self-Operating or Automatic Sprayer

The Climax of all Sprayers; combines every conceivable point of excellence, including economy, durability, low price and ease in carrying and operating.

Nothing but Galvanized Steel and Solid Brass or Copper used with 4-ply rubber hose—nothing to rust or corrode.

Eight to ten strokes of the plunger in air chamber will compress enough air to discharge the entire contents and make a continuous spray for nine minutes. This means that sprayer can be charged in fifteen

seconds, when it will work uninterruptedly long enough to spray a quarter acre of potatoes.

Prices

"Auto-Spray No. 1," Brass Tank (this is recommended)..... \$6 50
"Auto-Spray No. 1," Galvanized Steel Tank..... 5 00

Extras

Extension Pipes, two-foot lengths, Galvanized Steel, Brass Ends..... \$0 30
Extension Pipes, two-foot lengths, Solid Brass 35

The Wiss solid steel pruning shear will outlast a dozen low-priced pruners, and during all the time do better work and give better satisfaction—therefore will prove the cheapest.

Every pair of Wiss solid steel pruning shears is interchangeable. The blade with average care, will last for years. However, in case of accident or wear it may be replaced, and the pruner made as good as new. The Wiss pruner will snip a broom handle—that gives you an idea of the strength and quality. They will cut tissue paper, they will cut clean the thickest twigs or the most delicate tendrils without tearing.

I will replace free of charge any shears returned defective or unsatisfactory. Made in two sizes, nine and ten inch Price, 9 inch \$2.25, 10 inch \$2.50 Prepaid.

The "Boss" Roller

A strictly high grade lawn roller at a moderate cost. This roller is turned perfectly smooth on the outer surface; has steel axles, and the handles are of a new design, which make them rigid, durable and extremely neat in appearance. The "Boss" roller is without doubt the best made and most durable roller on the market.

No	Diam.	Length	Sec.	Lbs.	Price
1	15 in.	15 in.	2	150	\$7.60
3	20 "	16 "	2	225	11 20
4	20 "	20 "	2	250	12 40
6	20 "	24 "	3	300	14 80
8	20 "	30 "	3	350	17 20
